

## TWO CONFESS CHICAGO BOY'S MURDER

### GIBBONS SEEN AS WINNER IN BATTLE TODAY

Betting Favors Him Only By Slight Odds, However, as Contest Nears

### FEAR GEORGES' PUNCH

St. Paul Boy Must Evade Terrible Right Hand Blows of The Frenchman

Michigan City, Ind., May 31.—George Carpentier, ring idol of France, boxes in America for the third time today when he meets Tom Gibbons of St. Paul, the only boxer to stay the limit with Jack Dempsey, world's heavyweight champion, in a 10-round international contest to be decided late this afternoon in the sky blue arena on the eastern edge of this little city.

The former world's light-heavyweight champion making his American debut in 1920 with a spectacular victory over Battling Levinsky, then to succumb to the terrific punches of Jack Dempsey, in the famous "battle of the century" a year later, faces his physical and boxing equal this afternoon in what promises to be a thrilling duel of fists between two of the hardest hitting and cleverest light heavyweights in the world.

The betting odds today slightly favored Gibbons, a master boxer, to win newspaper decision in the event the contest goes the limit. There was considerable betting at even money that the contest would terminate in a knockout within seven rounds, with the sentiment as to the victor under those circumstances about evenly divided.

**Opinion Divided**

The majority of the newspaper writers believe that Gibbons, if he succeeds in evading Carpentier's dangerous right-hand blow for four or five rounds, would be returned the winner. The impression prevails among the experts that Gibbons, instead of intending to fight Carpentier at close range, probably would elect to box him and rely on wearing him down, tiring him out and making him the target for a finishing blow in the final round.

Both boxers, however, have promised an aggressive contest. Carpentier knows no other style. The French boxer, is noted for his tactics in carrying the fight to his opponent, always watching for an opportunity to sneak over his right-hand punch which almost dropped Jack Dempsey Carpentier, in his training, continually lashed out with this blow and added to his springing knees, indicating that he intends to keep as close as possible to Gibbons instead of allowing the flashy St. Paul boxer to keep him at a safe distance with his famous left hand.

Weather conditions early today were ideal for the contest. It was sunny and warm at 8 o'clock with an almost cloudless sky and a gentle breeze from the north off Lake Michigan.

Under these weather conditions the main event this afternoon is expected to start between 3 and 4 p. m., Central Standard Time the preliminaries beginning at 2 o'clock.

**Stribbling There**

Among the early arrivals of fist-tactables were Young Stribbling of Atlanta, Ga., with "Pa" and "Ma" for an introduction to the famous French light-heavyweight. They spent an hour at his camp last night. Gibbons and Carpentier were up early today ready for their introduction to each other and the physical examination and weighing. With the arrival of the first special train from Chicago, dumping its load of boxing fans, Michigan City awakened into full life before 10 o'clock. A crowd of 10,000, just at daybreak battered flippers commenced pouring into town, discharging the first thousands.

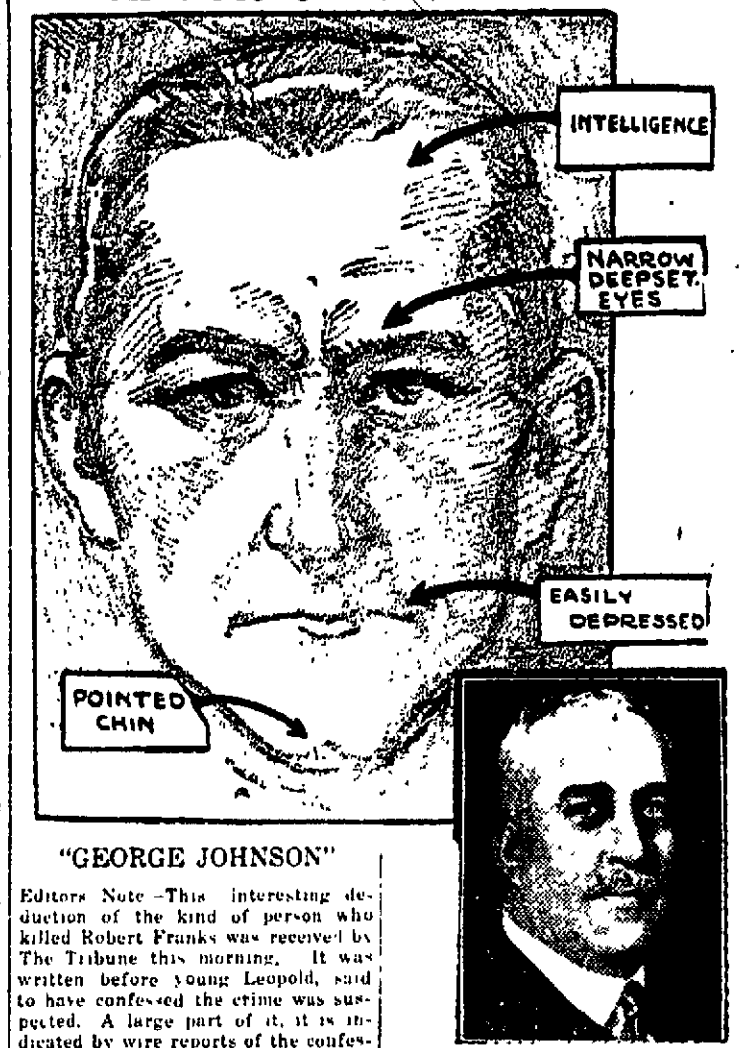

**MOTHER AND CHILD BURNED IN DICKINSON**

Dickinson, N. D., May 31.—Burns, caused by an explosion resulting when a fire in a laundry stove was kindled by machine, proved fatal to Mrs. John F. Franks, her young son, Alfred George, three, at St. Joseph's hospital where they were rushed immediately following the tragedy.

The explosion occurred when the mother attempted to kindle a fire in a laundry stove in the basement of the home at 401 Fifth Avenue West as she prepared to do the family washing. She had descended to the basement, placed fuel in the stove and poured oil for kindling over it, not noticing that the gas contained gasoline instead of kerosene which had always been used.

As had been her usual custom she permitted the child to apply the match. As he did so the oil charged flames shot out through the grate and enveloped his body. In a frantic effort to save her child, the mother grasped the boy and held him tight to her breast. The flames quickly spread burning all the clothing off both and consuming the flesh except where protected by the shoes.

### HOW NOTED ALIENIST CONSTRUCTED MIND PICTURE OF BOY'S MURDERER

Editors Note—This interesting deduction of the kind of person who killed Robert Franks was received by The Tribune this morning. It was written before young Leopold, said to have confessed the crime was suspected. A large part of it, it is indicated by wire reports of the confession, is a remarkably true hypothetical construction of the type who killed the boy.

**BY GEORGE BRITT**  
NEA Service Writer

Chicago, May 31.—The mysterious "George Johnson" who kidnaped and killed 15-year-old Robert Franks, hid his nude body in a lonely swamp and wrote a polished letter demanding \$10,000 from the boy's wealthy father was, in every move, registering a photograph of himself.

To develop this murky, spotted negative into a lifelike image is a task for the skilled alienist. It is herewith essayed by Dr. William O. Krohn, who has examined more than 25,000 psychopathic cases and testified as an expert in scores of famous trials.

"The criminal, in the first place, was a paranoiac rather than a pervert," says Dr. Krohn.

**Educated, Ambitious**

"Such a man is most common among educated classes. He has narrow, deepset eyes and pointed chin, suggesting mouth and high forehead. He noses right into everybody's business, yet suffers keenly from rebuffs and injuries.

"He is ambitious, either exalted in spirit or heavily depressed, and is easily exhausted. In his recent aucaction someone died of a wasting disease, such as tuberculosis.

"Born with a meanness within his being, he came to a strain and cracked. He is a monomaniac, perfectly normal in every respect but one."

"He knew his deed was wrong and had the will power to choose yes or No. He is legally sane, but mentally insane. He broods over his troubles, and imagines himself a martyr."

**Not a Moron**

Such is the man who set Chicago's best detectives to groping on their most intensive man hunt, caused the greater part of the faculty of the fashionable Harvard school to be grilling in police stations and plunged a mother into collapse.

Such a man, however, cannot live with himself after his crime, according to Dr. Krohn. He will either talk and give himself away or commit suicide.

"Robert Franks himself is the principal reason the motive could have been that of a moron," says Dr. Krohn.

"His father used to have his office in the same building with me. The boy would come into the barber shop for a haircut while I was getting shaved, and I saw him often.

"He was small for his age, but vigorous. He was a scrapper, and if he got into a corner he would fight his way out.

**Money the Motive**

"If a moron was planning an attack (Continued on page 3)

### SOUTH DAKOTA FARMERS JOIN ON DAIRY TOUR

Will See Diversification Put Into Practice in North Dakota on Trip

### ROUTE OF THE TRIP

Visits to New Salem and Flasher Are Planned as Part of the Tour

Information which has already been put into successful practice on how to change from grain farming to diversification will be obtained by the several thousand farmers who plan to attend the Flasher-New Salem-Mandan tour to be held June 17, 18 and 19.

Arrangements for the event are being made by County Agents R. C. Newcomer of Mandan and C. H. Wilson of Carson, members of the Flasher and New Salem dairy circuits, J. H. Shepperd of the North Dakota Agricultural college and officers of the Northern Great Plains Field station at Mandan, and the commercial clubs of the three cities to be visited.

Visits will be made to typical farms in the Flasher and New Salem dairy circuits, and programs will be held at each place. The three day tour will wind up at Mandan, where the party will inspect the Northern Great Plains field station and particular attention will be paid to the pasture demonstrations which are being conducted by John T. Survia in cooperation with J. H. Shepperd of the North Dakota Agricultural college.

**Flasher Meeting**

John Lee Coulter, president of the Agricultural college, will speak at the Flasher meeting June 17, and the New Salem meeting June 18. J. H. Shepperd will be on the program at New Salem and at Mandan the following day. Other speakers who will take in the entire tour include G. W. Randlett, director of the North Dakota Extension division; Director P. F. Trowbridge of the North Dakota Experiment station; A. M. Chubbey; A. G. Arnold, of the public speaking department and Dr. H. L. Walster, recently appointed dean of the school of agriculture at the college.

More than 300 South Dakota farmers are planning to make the tour, and a number from Montana are also expected to attend. The South Dakota delegation will leave Lemmon Tuesday morning, June 17, and will be headed by W. F. Kuntler, director of extension, and H. M. Jones, South Dakota dairy specialist.

South Dakota county agents who will bring delegations of farmers include A. M. Eberle of Bison, Floyd P. Collins of Faith and L. C. Lippert of Selby.

**Route of Tour**

The first stop will be made Tuesday morning, June 17, at the William Vogel farm west of Flasher, and after that the Charles Cotner farm will be visited. Dinner will be served by the Ladies Aid societies in Flasher and a program will be held there afterward. Following the program, a visit will be made to the Sawtell & Stowell farm north of Flasher and the party will return to Flasher for supper and to spend the night. An entertainment is being arranged for the evening.

The following morning will be spent in an inspection of the farms of the members of the New Salem dairy circuit, and a program will be held at New Salem at 2 p. m. Wednesday, June 18. In addition to those already mentioned, speakers at New Salem will include John Christensen and Charles Klusman, Jr., president and secretary of the New Salem Circuit; J. W. Hawn, development agent of the Northern Pacific railway; W. F. Reynolds, state dairy commissioner, and Max Morzan of the Fairmont creamery.

E. P. Mason of Devils Lake told the North Dakota Retail Merchants Association here this week that he had just finished taking part in a drive in Devils Lake where \$2,500 was raised to finance their boys band for several months. Devils Lake has been raising several thousand dollars a year for their Juvenile Band.

### ADJOURNMENT OF CONGRESS IS UNCERTAIN

Insistence Upon Farm Relief Bill Action, Other Measures, Clouds Action

### McNARY VOTE FAILS

Objection Made to Vote Tuesday, Longworth Objects To Vote Next Week

Washington, May 31.—(By the A. P.) Notice was served in the House today by Representative Longworth the Republican leader, that he would use every means to postpone a vote on the McNary-Haugen farm relief bill until next week. He made this announcement after objection had been made to his proposal for a vote on Tuesday.

**Adjournment Uncertain**

Washington, May 31.—As the house moved a notch nearer a vote on the McNary-Haugen farm relief bill, uncertainty as to whether congress will adjourn before the June political conventions continued.

Demands for favorable action on the measure or an acceptable substitute, reclamation relief, Murele Shoals and the bill to abolish the railroad labor board were reiterated, and various representatives and senators continued predictions that adjournment might be blocked, but Republican leaders, particularly in the house, expressed confidence that developments next week would pave the way for a windup of the session by Saturday.

**Borah Sees President**

Yesterday afternoon, Senator Borah, Republican, Idaho, who has been asserting his disposition of legislation designed to afford relief to settlers on reclamation projects, conferred with President Coolidge. Later, the word went out that the White House that the president hoped nothing would prevent congressional action on the proposals, now pending before the house irrigation committee, which carry out the recommendations of Secretary Work's fact-finding commission.

The house resumed consideration of the McNary-Haugen bill with its supporters somewhat at sea as to what should be done in the event it meets defeat. Some declared they believed a substitute should be reported to, although there appeared to be marked differences of opinion as to what sort of a compromise should be offered, while others contended that rejection of the McNary-Haugen proposal would show the futility of attempting to get effective farm relief legislation through at this session, and that congress might as well adjourn.

### HUGE REFUNDS ON RATES MADE

Chicago, May 31.—Refunds on freight bills of many millions of dollars have been made possible for livestock producers through the efforts of 28 livestock exchanges, according to announcement by the Chicago livestock exchange.

The National Livestock exchange has obtained a decision affecting western territory from the interstate commerce commission whereby shippers are saved from \$1 to \$3 per car. Retroactive to 1921, the decision affects 1,000,000 cars of livestock shipped annually. The commission sustained the contention of the exchange that cost of holding livestock cars is part of the rate.

Another decision has been obtained by the exchange in the "move-out" case brought against all railroads. The decision prevents carriers from charging the highest rate for the highest minimum weight at present, substituting a rate based on the minimum weight of a particular commodity, in estimated average reduction of \$10 per car.

### Weather Report

For twenty-four hours ending at noon today.

Temperature at 7 a. m.	47
Temperature at noon 5:15 P.M.	66
Highest yesterday	66
Lowest yesterday	39
Lowest last night	40
Precipitation	0
Highest Wind velocity	8

**Weather Forecasts**

For Bismarck and vicinity: Unsettled to-night and Sunday. Warmer to-night. Somewhat cool Sunday.

For North Dakota: Unsettled to-night and Sunday. Warmer tonight. Somewhat cool Sunday.

**General Weather Conditions**

The weather is fair throughout the northern states and along the Pacific Coast while precipitation occurred over the middle and southern Rocky Mountain region and in the middle and southern Plains States. Seasonable temperatures prevail in all sections.

**ORRIS W. ROBERTS, Meteorologist.**

Dr. Foley of Indiana University calculates that 2,434,026 tons of coal are consumed annually in generating steam to blow the United States locomotive whistles.

### MURDERED

ROBERT FRANKS

### PROTECTION IN TIME OF PEACE IS TASK OF U.S.

Nation Must Depend on Loyalty of Its Citizens, Says Scott Cameron

### BIG PARADE IS HELD

The nation has much means to protect itself from enemies from without during times of war, but it has no defense during times of peace, except the loyalty in the hearts of its citizen, Scott Cameron told an audience at the city Auditorium yesterday afternoon in delivering the Memorial Day address here.

It was learned during the World War, he said, that there were at that time agents of foreign power scattered all over the country to sow the seeds of distrust and disloyalty. The Republic can be preserved only through the steadfast loyalty and patriotism of its institutions by the people at all times, he said.

Mr. Cameron, in delivering his eulogy, declared that American soldiers and sailors made a sacrifice for the Republic, and that the nation is the only one that never waged war except in defense of a just and peaceful cause. He urged the Revolutionaries who were in the forefront of the fight for the Republic to be remembered by the nation to achieve religious freedom and the War of 1812 which led to establish the principle of the freedom of the seas.

The speaker also paid a special tribute to the memory of the great Civil War of 1861-1865 for which Memorial Day was founded. There were a few of the veterans of this conflict in the audience on the platform.

The funeral of a son of Mrs. Schenk, with Mrs. Bauer as accompanist, will be held at the home of Mrs. Bauer, 1015 S. 1st St., at 2 o'clock today. The funeral will be held at the home of Mrs. Bauer, 1015 S. 1st St., at 2 o'clock today.

**RUINED LIP WORTH \$2,500**

Los Angeles, May 31. Lips, laid out by poets from time immemorial and always a favored topic of conversation between lovers, recently have a more or less financial standing as the result of a state supreme court decision handed down here by Judge Gertrude Steele, beauty specialist, must pay Praline Hall, motion picture actress, \$2,500 for one ruined lower lip.

### SONS OF MILLIONAIRES, BOTH STUDENTS, ADMIT CRIME AFTER LONG GRILLING BY AUTHORITIES

Leopold and Loeb Succumb to 36 Hours of Grilling, According To States Attorney Crowe, Who Says Both Are Calm After Making the Confession — Had Planned The Kidnaping For Ransom

Chicago, May 31.—(By the A. P.)—Robert E. Crowe, states attorney, announced early today that Nathan E. Leopold, Jr. and Richard Loeb, youthful members of wealthy Chicago families and both post-graduate students at a University here, had confessed that they kidnaped and murdered 15-year-old Robert Franks, son of Jacob Franks, retired millionaire pawn broker and manufacturer.

They said they planned a kidnaping in great detail last November, both through a spirit of adventure and because they wanted the \$10,000 ransom they demanded, said Mr. Crowe. The youths said they determined upon no definite victim, and that the kidnaping and murder of young Franks was merely incidental.

The kidnaping was carried out in every detail as planned, including the victim's death, Mr. Crowe said. Leopold admitted writing a letter to the father of the Franks boy, demanding \$10,000 and that the automobile used to spirit away their victim was a rented machine.

The finding of the spectacles near the boy's body provided one only tangible clue, said Mr. Crowe. "It was through them that the kidnaping and slaying were traced to young Leopold. The typewriter, and clothing stripped from young Franks have not been recovered, said Mr. Crowe, but he expected to have them this afternoon.

### NEW CALL ON CAPITAL STOCK IS ANNOUNCED

Agricultural Credit Corporation in New Move to Relieve Northwest

Washington, May 31.—(By the A. P.)—Treasury officials were advised that the Agricultural Credit Corporation, organized at the instance of the President to relieve the stringency in the Northwest, has made a second call on its capital subscription. The call is for \$2,000,000, making a total of \$4,000,000 paid in from a total authorized capital of \$10,000,000.

With this second \$2,000,000 available treasury officials believe the loaning powers of the corporation will be able to meet all current calls upon it. It already has approved loans of \$1,135,000 for the purpose of reopening 11 closed banks. Two of them have actually started business again and advances here were to the effect that others would open as soon as necessary papers are made.

In addition to loans for reopening banks the corporation has agreed to loan \$1,614,000 to 64 other financial institutions in the financial districts.

Secretary Mellon was told by officials of the corporation that they are making other loans for the benefit of farmers by taking up tax warrants at 6 percent rate as against the 12 percent rate which would be charged under tax penalty clauses. Loans for seed purposes have been made.

**DEATH HALTS OVERLAND TOUR IN WESTERN N. D.**

Dickinson, N. D., May 31.—Death lurking about the tourist camp at Gladstone Wednesday night, abruptly halted the overland trip of James Louis Gould, 42, Spokane business man, who with his wife and four children was traveling to Chicago by car for an extended visit with relatives.

Mr. Gould, who had not been in good health for some time, was stricken with cerebral hemorrhage shortly after the family had pitched camp at Gladstone in the early evening. A local physician called to the scene arrived too late to check the fatal "brain spark" of life and death came shortly afterward.

The body was brought to Dickinson Thursday morning and prepared for burial by a local undertaker. Accompanied by the widow and children it will be shipped to Spokane on train No 1 Friday afternoon for interment. The car and camping equipment will be left at Gladstone for a time.

Mr. Gould had been engaged in the garage business at Spokane recently he decided to make the trip to the west in the hope that the change would benefit his failing health.

Learning of the tragedy residents of Gladstone hastened to the assistance of the stricken family and did everything in their power to comfort them in their sorrow.

### HAD PLANNED KIDNAPING OF ROSENWALD SON

Chicago, May 31. (By the A. P.)—States Attorney Robert E. Crowe, after announcing today that Nathan E. Leopold, Jr. and Richard Loeb, sons of millionaires, had confessed the kidnaping and slaying of Robert Franks, 15-year-old son of another millionaire, declared they once had considered kidnaping a son of Julius Rosenwald, internationally known philanthropist.

### ALLIES KEEP A FIRM HAND

London, May 31 (By the A. P.)—The allies intend to keep a firm hand on military control in Germany by maintaining the commission of control in full operation until the disarmament demand made in the treaty of Versailles are fully executed, according to a long note from the Council of Ambassadors, sent to Berlin from Paris today.

# TWO CONFESS CHICAGO BOY'S MURDER

## GIBBONS SEEN AS WINNER IN BATTLE TODAY

Betting Favors Him Only By Slight Odds, However, as Contest Nears

### FEAR GEORGES' PUNCH

St. Paul Boy Must Evade Terrific Right Hand Blows of The Frenchman

Michigan City, Ind., May 31.—George Carpentier, ring idol of France, boxes in America for the third time today when he meets Tom Gibbons of St. Paul, the only boxer to stay the limit with Jack Dempsey, world's heavyweight champion, in a 10-round international contest to be decided late this afternoon in the sky blue arena on the eastern edge of this little city.

The former world's light-heavyweight champion making his American debut in 1920 with a spectacular victory over Battling Levinsky, then to succumb to the terrific punches of Jack Dempsey, in the famous "battle of the century" a year later, faces his physical and boxing equal this afternoon in what promises to be a thrilling duel of fists between two of the hardest hitting and cleverest light heavyweights in the world.

The betting odds today slightly favored Gibbons, a master boxer, to win newspaper decision in the event the contest goes the limit. There was considerable betting at even money that the contest would terminate in a knockout within seven rounds, with the sentiment as to the victor under those circumstances about evenly divided.

### Opinion Divided

The majority of the newspaper writers believe that Gibbons, if he succeeds in evading Carpentier's dangerous right-hand blow for four or five rounds, would be returned the winner. The impression prevails among the experts that Gibbons, instead of intending to fight Carpentier at close range, probably would elect to box him and rely on wearing him down, tiring him out and make him the target for a finishing blow in the final round.

Both boxers, however, have promised an aggressive contest. Carpentier knows no other style. The French boxer, is noted for his tactics in carrying the fight to his opponent, always watching for an opportunity to sneak over his right-hand punch which almost dropped Jack Dempsey. Carpentier, in his training, continually lashed out with this blow and crowded into his sparring mates, indicating that he intends to keep as close as possible to Gibbons instead of allowing the St. Paul boxer to keep him at a safe distance with his famous left hand.

Weather conditions early today were ideal for the contest. It was sunny and warm at 8 o'clock with an almost cloudless sky and a gentle breeze from the north off Lake Michigan.

Under these weather conditions the main event this afternoon is expected to start between 3 and 4 p. m. Central Standard Time. The preliminaries beginning at 2 o'clock.

### Striking There

Among the early arrivals of fight notables were Young Stribling of Atlanta, Ga., with "Pa" and "Ma" for an introduction to the famous French light-heavyweight. They spent an hour at his camp last night.

Gibbons arrived ready for their introduction to each other and the physical examination and weighing. With the arrival of the first special trains from Chicago, dumping its load of boxing fans, Michigan City awakened into full life prepared to handle a crowd of at least 30,000. Just at daybreak battered fire trucks commenced pouring into town, discharging the first thousands.

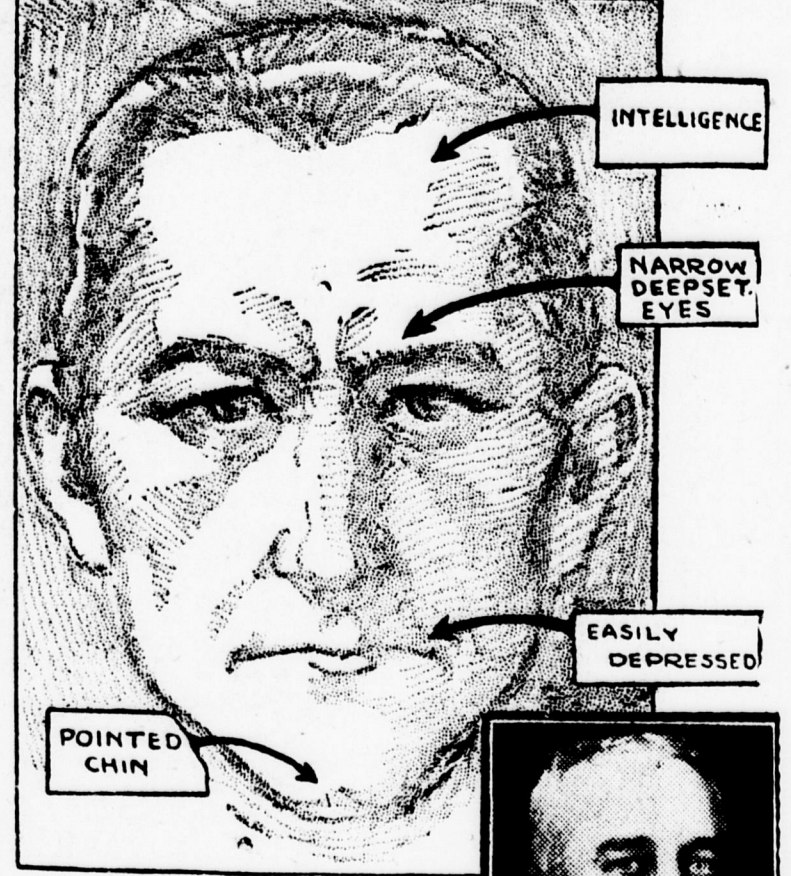

## MOTHER AND CHILD BURNED IN DICKINSON

Dickinson, N. D., May 31.—Burns, caused by an explosion resulting when a fire in a laundry stove was kindled by gasoline, proved fatal for Mrs. John Friend and her young son, Alfred George, three, at St. Joseph's hospital where they were rushed immediately following the tragedy.

The explosion occurred when the mother attempted to kindle a fire in a laundry stove in the basement of the home at 401 Fifth Avenue West as she prepared to do the family washing. She had descended to the basement, placed fuel in the stove and poured oil for kindling over it, not noticing that the can contained gasoline instead of kerosene which had always been used.

As had been her usual custom she permitted the child to apply the match. As he did so the oil charged flames shot out through the grate and enveloped his body. In a frantic effort to save her child, the mother grasped the boy and held him tight to her breast. The flames quickly spread burning all the clothing off both and consuming the flesh except where protected by the shoes.

## JACK HINTGEN ESTABLISHES NEW 18-HOLE RECORD ON GOLF COURSE

Jack Hintgen of Mandan is receiving the congratulations of all Bismarck golfers today.

Hintgen yesterday made the nine holes of the Bismarck Town and Country Club in 37, which is par for the course—theoretically perfect golf and the ambition of all golfers.

Not only that but Hintgen just previously made the course in 38, which gave him a score of 75 for 18 holes—the lowest 18-hole score on the Bismarck course.

Hintgen in his second round in which he made 37, had a birdie three on the first hole and birdie three on the eighth hole, and was one over on the seventh and ninth, which gave him the par score. Other holes he

## SOUTH DAKOTA FARMERS JOIN ON DAIRY TOUR

Will See Diversification Put Into Practice in North Dakota on Trip

### ROUTE OF THE TRIP

Visits to New Salem and Flasher Are Planned as Part of the Tour

Information which has already been put into successful practice on how to change from grain farming to diversification will be obtained by the several thousand farmers who plan to attend the Flasher-New Salem-Mandan tour to be held June 17, 18 and 19.

Arrangements for the event are being made by County Agents R. C. Newcomer of Mandan and C. H. Willson of Carson, members of the Flasher and New Salem dairy circuits, J. H. Shepperd of the North Dakota Agricultural college and officers of the Northern Great Plains Field station at Mandan, and the commercial clubs of the three cities to be visited.

Visits will be made to typical farms in the Flasher and New Salem dairy circuits and programs will be held at each place. The three-day tour will wind up at Mandan, where the party will inspect the Northern Great Plains field station and particular attention will be paid to the pasture demonstrations which are being conducted by John T. Sarvis in cooperation with J. H. Shepperd of the North Dakota Agricultural college.

### Flasher Meeting

John Lee Coulter, president of the Agricultural college, will speak at the Flasher meeting June 17 and the New Salem meeting June 18. J. H. Shepperd will be on the program at New Salem and at Mandan the following day. Other speakers who will take in the entire tour include G. W. Randlett, director of the North Dakota Extension division; Director P. F. Trowbridge of the North Dakota Experiment station; A. M. Chalkey; A. G. Arnold of the public speaking department and Dr. H. L. Walster, recently appointed dean of the school of agriculture at the college.

More than 300 South Dakota farmers are planning to make the tour, and a number from Montana are also expected to attend. The South Dakota delegation will leave Lemmon Tuesday morning, June 17, and will be headed by W. E. Kumlum, director of extension, and H. M. Jones, South Dakota dairy specialist.

South Dakota county agents who will bring delegations of farmers include A. M. Eberle of Bison, Floyd F. Collins of Faith and L. C. Lippert of Selby.

### Route of Tour

The first stop will be made Tuesday morning, June 17, at the William Vogel farm west of Flasher, and after that the Charles Cotner farm will be visited. Dinner will be served by the Ladies Aid societies in Flasher and a program will be held there afterward. Following the program, a visit will be made to the Sawtell & Stowell farm north of Flasher and the party will return to Flasher for supper and to spend the night. An entertainment is being arranged for the evening.

The following morning will be spent in an inspection of the farms of the members of the New Salem dairy circuit, and a program will be held at New Salem at 2 p. m. Wednesday, June 18. In addition to those already mentioned, speakers at New Salem will include John Christiansen and Charles Klusman, Jr., president and secretary of the New Salem circuit; J. W. Haw, development agent of the Northern Pacific railway; W. F. Reynolds, state dairy commissioner, and Max Morgan of the Fairmont creamery.

Thursday, June 19, will be spent at Mandan, where the party will assemble in the square at the Northern Pacific depot and drive out to the trial pastures, which are three and one-half miles from town. Following the inspection of the grazing trials, the party will proceed to the field station grounds and inspect the crop and tree trial plantings. A program will be held at 2:30 p. m. at the field station.

## CHILD ESCAPES SERIOUS INJURY

Beach, N. D., May 31.—The four-year-old son of C. A. Halverson, living three miles northwest of Beach, had a very narrow escape from death or permanent injury and has been in the local hospital since, but is happily on the road to rapid recovery.

The accident occurred while the boy was making candy on the kitchen stove when a dynamite cap, that had gotten into the coal, exploded, the cap flying out of the grate and entering the chest cavity of the boy. He was rushed to town and the wound probed, but it was deemed best to leave him where it was and to bebed in the delicate tissue rather than operate further. The little fellow is doing fine and will leave for home in a day or two none the worse for wear, but don't want any more dynamite in his candy.

## ADJOURNMENT OF CONGRESS IS UNCERTAIN

Insistence Upon Farm Relief Bill Action, Other Measures, Clouds Action

### McNARY VOTE FAILS

Objection Made to Vote Tuesday, Longworth Objects To Vote Next Week

Washington, May 31. (By the A. P.)—Notice was served in the House today by Representative Longworth of the Republican leader, that he would use every means to postpone a vote on the McNary-Hagen farm relief bill until next week. He made this announcement after objection had been made to his proposal for a vote on Tuesday.

### Adjournment Uncertain

Washington, May 31.—As the house moved a notch nearer a vote on the McNary-Hagen farm relief bill, uncertainty as to whether congress will adjourn before the June political conventions continued.

Demands for favorable action on the measure or an acceptable substitute, reclamation relief. Muscle Shoals and the bill to abolish the railroad labor board were reiterated, and various representatives and senators continued predictions that adjournment might be blocked, but the public leaders, particularly in the house, expressed confidence that developments next week would pave the way for a windup of the session by Saturday.

### Borah Sees President

Yesterday afternoon, Senator Borah, Republican, Idaho, who has been insisting on disposition of legislation designed to afford relief to settlers on reclamation projects, conferred with President Coolidge. Later, the word went out from the White House that the president hoped nothing would prevent congressional action on the proposals, now pending before the house irrigation committee, which carry out the recommendations of Secretary Work's last-finding commission.

The house resumed consideration of the McNary-Hagen bill with its supporters somewhat at sea as to what should be done in the event it meets defeat. Some declared they believed a substitute should be resorted to, although there appeared to be marked differences of opinion as to what sort of a compromise should be offered, while others continued to insist that the McNary-Hagen proposal would show the futility of attempting to get effective farm relief legislation through at this session, and that congress might as well adjourn.

## HUGE REFUNDS ON RATES MADE

Chicago, May 31.—Refunds on freight bills of many millions of dollars have been made possible for livestock producers through the efforts of 28 livestock exchanges, according to announcement by the Chicago livestock exchange.

The National Livestock exchange has obtained a decision affecting western territory from the interstate commerce commission whereby shippers are saved from \$1 to \$5 per car. Retroactive to 1920, the decision affects 1,000,000 cars of livestock shipped annually. The commission sustained the contention of the exchange that cost of bedding livestock cars is part of the rate.

Another decision has been obtained by the exchange in the "mixed car" case brought against all railroads. The decision prevents carriers from charging the highest rate for the highest minimum weight as at present, substituting a rate based on the minimum weight of a particular commodity, an estimated average reduction of \$10 per car.

### Weather Report

For twenty-four hours ending at noon today.  
Temperature at 7 a. m. 47  
Temperature at noon 51  
Lowest yesterday 66  
Lowest last night 39

Highest Wind velocity 8

### Weather Forecasts

For Bismarck and vicinity: Unsettled to-night and Sunday. Warmer to-night. Somewhat cool Sunday.

### General Weather Conditions

The weather is fair throughout the northern states and along the Pacific Coast while precipitation occurred over the middle and southern Rocky Mountain region and in the middle and southern Plains States. Seasonable temperatures prevail in all sections.

### ORRIS W. ROBERTS, Meteorologist.

Dr. Foley of Indiana University calculates that 2,434,026 tons of coal are consumed annually in generating steam to blow the United States locomotive whistles.

## MURDERED

ROBERT FRANKS

## PROTECTION IN TIME OF PEACE IS TASK OF U. S.

Nation Must Depend on Loyalty of Its Citizens, Says Scott Cameron

### BIG PARADE IS HELD

The nation has ample means to protect itself from enemies from without during times of war—but it has no defense during times of peace, except the loyalty in the hearts of its citizens, Scott Cameron told an audience at the city Auditorium yesterday afternoon in delivering the Memorial Day address here.

It was learned during the World War, he said, that there were at that time agents of a foreign power scattered all over the country to sow the seeds of distrust and disloyalty. The Republic can be preserved only through the steadfast loyalty and appreciation of its institutions, by the people at all times, he said.

Mr. Cameron, in delivering his eulogy, declared the American soldier and sailor occupied a unique position, saying that this nation is the only one that never waged war except in defense or for an unselfish cause, beginning with the Revolutionary War which he said had its inception in a determination to achieve religious tolerance and the War of 1812 which followed to establish the principle of the freedom of the seas.

The speaker paid an especial tribute to the soldiers of the great civil war of 1861 to 1865, for whom Memorial Day was founded. There were a few of the veterans of this conflict in places of honor on the platform.

The program included a solo by Mrs. Schoepkopf, with Mrs. Bauer as accompanist, a solo by Henry Halverson, and delivery of Lincoln's Gettysburg address by George Knowles.

The parade which preceded the exercises was one of the longest in several years, there being an especially large number of veterans of the World War in line. The Elks Band, Juvenile Band and St. Mary's Band played. Capt. H. T. Murphy, marshal of the day, had thoughtfully arranged to have the parade pass both hospitals for the benefit of those who could witness the parade from there, and as a mark of respect to disabled veterans. A large number of nurses marched in the parade.

## RUINED LIP WORTH \$2,500

Los Angeles, May 31.—Lips, lashed by poets from time immemorial and always a favored topic of conversation between lovers, recently have a more or less financial standing as the result of a state supreme court decision handed down here. By it Gertrude Steele, beauty specialist, must pay Pauline Hall, motion picture actress, \$2,500 for one ruined lower lip.

## SONS OF MILLIONAIRES, BOTH STUDENTS, ADMIT CRIME AFTER LONG GRILLING BY AUTHORITIES

Leopold and Loeb Succumb to 36 Hours of Grilling, According To States Attorney Crowe, Who Says Both Are Calm After Making the Confession — Had Planned the Kidnaping For Ransom

Chicago, May 31. — (By the A. P.) — Robert E. Crowe, states attorney, announced early today that Nathan E. Leopold, Jr. and Richard Loeb, youthful members of wealthy Chicago families and both post-graduate students at a University here, had confessed that they kidnaped and murdered 13-year-old Robert Franks, son of Jacob Franks, retired millionaire pawn broker and manufacturer.

They said they planned a kidnaping in great detail last November, both through a spirit of adventure and because they wanted the \$10,000 ransom they demanded, said Mr. Crowe. The youths said they determined upon no definite victim, and that the kidnaping and murder of young Franks was merely incidental.

## NEW CALL ON CAPITAL STOCK IS ANNOUNCED

Agricultural Credit Corporation in New Move to Relieve Northwest

## HAVE MADE MANY LOANS

Washington, May 31 (By the A. P.) — Treasury officials were advised that the Agricultural Credit Corporation, organized at the instance of the President to relieve the stringency in the Northwest, has made a second call on its capital subscription. The call is for \$2,000,000, making a total of \$4,000,000 paid in from a total authorized capital of \$10,000,000.

With this second \$2,000,000 available treasury officials believe the loaning powers of the corporation will be able to meet all current calls upon it. It already has approved loans of \$1,135,000 for the purpose of reopening 11 closed banks. Two of them have actually started business again and advances were made to the effect that others would open as soon as necessary papers are made.

In addition to loans for reopening banks the corporation has agreed to loan \$1,164,000 to 64 other financial institutions in the financial districts.

Secretary Mellon was told by officials of the corporation that they are making other loans for the benefit of farmers by taking up tax warrants at 6 percent rate against the 12 percent rate which would be charged under tax penalty clauses. Loans for seed purposes have been made.

## DEATH HALTS OVERLAND TOUR IN WESTERN N. D.

Dickinson, N. D., May 31.—Death lurking about the tourist camp at Gladstone Wednesday night, abruptly halted the overland trip of James Louis Goude, 42, Spokane business man, who with his wife and four children was traveling to Chicago by car for an extended visit with relatives.

Mr. Goude, who had not been in good health for some time, was stricken with cerebral hemorrhage shortly after the family had pitched camp at Gladstone in the early evening. A local physician called to the scene arrived too late to check the fast ebbing spark of life and death came shortly afterward.

The body was brought to Dickinson Thursday morning and prepared for burial by the local undertaker. Accompanied by the widow and children it will be shipped to Spokane on train No. 1 Friday afternoon for interment. The car and camping equipment will be left at Gladstone for a time.

Mr. Goude had been engaged in the garage business at Spokane. Recently he decided to make the trip east in the hope that the change would benefit his failing health.

Learning of the tragedy residents of Gladstone hastened to the assistance of the stricken family and did everything in their power to comfort them in their sorrow.

## HAD PLANNED KIDNAPING OF ROSENWALD SON

Chicago, May 31. (By the A. P.) —States Attorney Robert E. Crowe, after announcing today that Nathan E. Leopold, Jr., and Richard Loeb, sons of millionaires, had confessed the kidnaping and slaying of Robert Franks, 13-year-old son of another millionaire, declared they once had considered kidnaping a son of Julius Rosenwald, internationally known philanthropist.

The kidnaping was carried out in every detail as planned, including the victim's death, Mr. Crowe said Leopold and Loeb confessed. He said Leopold admitted writing a letter to the father of the Franks boy, demanding \$10,000 and that the automobile used to spirit away their victim was a rented machine.

"The finding of the spectacles near the boy's body provided our only tangible clue," said Mr. Crowe. "It was through them that the kidnaping and slaying were traced to young Leopold. The typewriter, and clothing stripped from young Franks have not been recovered, said Mr. Crowe, but he expected to have them this afternoon.

### Killed by Blow

"The little fellow was killed by a blow on the head, and then strangled," States Attorney Crowe declared. "A chisel wrapped with tape was used to strike the blow."

The chisel was found by a Herald and Examiner reporter about four blocks from the school which the Franks boy attended. States Attorney Crowe added that ether was to be used if the boy had not been killed as he was. This, he said, was all explained in the confession.

The killing, they admitted, Mr. Crowe said, occurred in an automobile of the same make as owned by Leopold.

### Fathers Wealthy

Ernest Loeb, brother of Richard Loeb, received the information given out by the states attorney with incredulity.

"It cannot be so," he asserted. "We know exactly where Dick was every hour of this particular Wednesday."

Loeb is the son of Albert H. Loeb, millionaire vice-president of Sears, Roebuck and Company.

Leopold's father is a very wealthy box manufacturer, said to be especially known in lake shipping circles.

Leopold and Loeb each accused one another of striking the blow with the chisel.

### Entirely Calm

Leopold was entirely calm as he made his confession, Mr. Crowe said.

Both prisoners have been studying law and told apparently frank stories until confronted with discrepancies in their stories after 36 hours of grilling. They finally yielded and began making admissions, but even after making the confessions, Mr. Crowe declared, remained composed. Leopold, he said, was entirely nonchalant about it.

### To Grand Jury

Mr. Crowe declared the case would be presented to the new June grand jury, the first case to be placed in the jurors' hands.

The stenographic notes of the alleged confessions, he said, were locked up, and although he said they might be made public late today, he was taking every precaution to make the case complete.

It was Leopold's spectacles—thy principal clue in the case—found on the prairie near the culvert where the Franks' boy's body was thrust into a railroad cut, that led to the arrest of Leopold and Loeb, Mr. Crowe explained. In admitting they killed the Franks boy the two young men said, according to Mr. Crowe, that they struck him with a (Continued on page 3)

## ALLIES KEEP A FIRM HAND

London, May 31 (By the A. P.) —The allies intend to keep a firm hand on military control on Germany by maintaining the commission of control in full operation until the disarmament demand made in the treaty of Versailles are fully executed, according to a long note from the Council of Ambassadors, sent to Berlin from Paris today.

## STATE LOSES IN CHECK CASE

Bottineau County Wins Mandamus Action

Bottineau county is exempted from loss of \$19,011.82, the amount of a check given by the treasurer of the county to the state of North Dakota on the first National Bank of Bottineau, which closed, in a decision handed down today by District Judge Fred Janssonius.

The county treasurer had collected from purchasers or lessees of school lands in Bottineau county and gave a check to the state treasurer. The check was sent through the Bank of North Dakota and in the meantime the Bottineau bank closed. John Stren state treasurer held up payment of state tuition fund money to Bottineau county, holding the county should make good its bad check. A mandamus action was brought by Bottineau county to compel payment of this tuition money, which is sustained by the decision.

Judge Janssonius holding that the county treasurer was acting as an agent of the state, found it unnecessary to decide whether or not the Bank of North Dakota, through which the check passed, was liable, but in answering the question "Does the Bank of North Dakota sustain the same status and is it subject to the same laws as other banks?" said: "It is, however, my view that the same liability that is imposed on private banks is imposed on the Bank of North Dakota, including liability for negligence."

In 1818 one Bowdler published an expurgated edition of Shakespeare, hence arose the verb to bowdlerize.

## NEW JERSEY'S ACE ON SQUAD

CLARENCE PLATT

An announcement has been made that Clarence Platt of Bridgeton, champion shot of New Jersey, has been named to compete with the Americans at the Olympic trap shooting event in Paris this summer.

The word August (the name of the month and the adjective) is derived from the name of the first Roman emperor.

## WOMEN TACKLE WORLD PROBLEM

Will Discuss Problems of World Interest at Federation Convention

By NEA Service  
Los Angeles, May 31.—The General Federation of Women's Clubs, representing 2,000,000 club women and sometimes called the balance wheel

of American feminine activities, holds its biennial convention here June 2 to 13.

California, hostess state, has made ready for the coming of the 10,000 delegates with every conceivable plan-hospitality can conjure.

The convention will be notable this year in two respects—for its program and its election situation. Immigration; the feasibility of uniform marriage and divorce laws; the traffic in narcotics, the latest developments of applied education, the world peace court—all these are problems to be threshed out before the convention adjourns.

The federation is said to be split three ways, on a choice for a new

president. At least, these three women have been mentioned most prominently as candidates: Mrs. John D. Sherman, Estes Park, Colo.; Mrs. W. S. Jennings, Jacksonville, Fla.; and Mrs. Wallace T. Perham, Glendale, Mont.

Resolutions will be introduced, it is expected, urging both political parties in the coming presidential campaign to incorporate in party platforms plans for a world court, indorsement of the Better Homes in America Movement, a federal prison for women and a world opium conference.

Gin gets its name from the French "genievre" for juniper.

## SEE VICTIMS OF ACCIDENT

## LODGE TAKES STAND, STRIKES AT STATEMENT

Senator Declares He Knew Nothing of Liquor Permits, as Means Said

### DISTURBANCE RAISED

Washington, May 31.—Senator of Massachusetts, the Republican Senate leader, took the witness stand today before the Daugherty committee and made an explicit declaration that he had never aided in the issue of export liquor permits as indicated in recent testimony by Gaston B. Means.

The story told by Means was that a permit in which Senator Lodge interested himself, resulted in the export of Canada by Craven Brothers of a consignment of liquor which later was landed by smugglers off Atlantic City. The Senator declared, however, that he "never knew of the existence of Craven Brothers."

The committee then heard another volunteer witness, A. L. Fink of Rochester, N. Y., associated in committee testimony with Roxie Stinson, and he launched into a series of charges which created a disturbance that had to be quieted by the Senate police.

Fink shouted that he was "the man Frank Vanderlip tried to give \$1,000 for perjured testimony against President Coolidge" and that he wanted to tell how Senator Wheeler, the committee prosecutor, got "hoose for Roxie Stinson."

"We don't want your lies," Chairman Brookhart thundered back at him, and Senator Ashurst, Arizona, Democrat, the only other committee member present, told Fink he was a criminal.

Senator Ashurst reported to "put him out if the chairman will allow" and Fink left the room before Senator Wheeler entered. A moment later, the committee sent for him.

At the end of Means' cross-examination, Chairman Brookhart announced that the committee desired to hear former Attorney-General Daugherty next Friday.

Counsel for Mr. Daugherty agreed to communicate with their client and advise whether he could appear on that date.

## ASKS PARENTS AVOID ARRESTS

### Chief of Police Warns Against Children Driving Cars

The police have launched a new objective to obtain careful automobile driving.

Chief of Police Martenson today called general attention to the law prohibiting children under 16 years of age from driving automobiles, and urged parents to respect the law, to avoid arrests. He also warned against bright headlights and called attention to the ordinance regarding dimmers on cars.

Five additional speeders were taken over the holiday, most of them on the concrete or prison road. No accidents were reported to the police.

## HEBRON MAN IS BURNED

Fred Braun Is Probably Fatally Injured

Mandan, N. D., May 31.—Fred Braun, a prominent miller and elevator man of Hebron, was probably fatally burned Memorial Day noon when he attempted to encourage a fire in the range with kerosene. The can exploded and lacerated his face. The kerosene saturated his clothes. He ran to a creek with his clothes burning. His body was badly burned from the hips down.

He was taken to Dickinson to a hospital. The house was set on fire. His recovery is doubtful.

## CHARGES FOR WEIGHING CUT

St. Paul, Minn., May 31.—Livestock shippers of the northwest will be saved from \$10,000 to \$15,000 a year as a result of the reduction of weighing charges on cattle and calves in the South St. Paul yards, which will become effective June 1.

Frank W. Matson, railroad and warehouse commissioner in charge of state weighing activities announced yesterday.

The order for the reduction was issued by the commission yesterday following an investigation by Commissioner Matson of conditions at the stockyards and follows a plan of rigid economy in that department.

The reduction is 100 percent, the price for weighing previously being 2 cents and now reduced to 1 cent per head. Weighing of hogs and sheep remains at the same price, namely 1 cent per head.

## FORECAST FOR NEXT WEEK

Washington, May 31.—Weather outlook for the week beginning Monday: Region of the Upper Mississippi Valley—Local showers at beginning and again near end of week; otherwise generally fair; temperature near or slightly below normal.

The world's total wool production is more than 500,000,000 pounds a year in excess of total production.

# What the World Is Doing

As Seen by Popular Mechanics Magazine

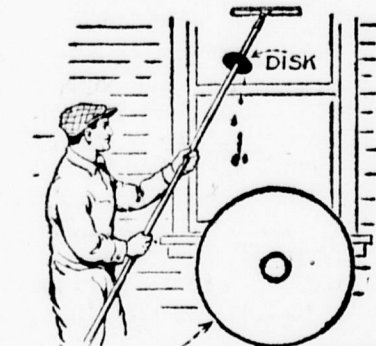

### Nine Million Persons Daily Ride in City's Elevators

More than 9,000,000 passengers daily, it is estimated, are carried by the elevators in New York City. This number exceeds the number of riders on the street railways, subways, and electric lines, it is said. In many large buildings traffic rules and schedules are observed almost as scrupulously as those of large railroads, in order that adequate service may be rendered.

### Kink for Window Washers

When washing windows the surplus water has an annoying tendency to run down the handle of the cleaner and into the sleeves or onto the clothing of the worker. This trouble may be eliminated by placing a small rubber disk on the handle, about a foot from the end, as shown in the illustration. The water will then run down only to the disk and drip off.

The disk should be about 4 in. in diameter and should be cut from soft

4-DISK CUT FROM INNER TUBE

rubber, such as a piece of inner tube. A hole slightly smaller than the thickness of the disk is cut in the center of the disk so that it will fit the handle snugly when slipped into place.

One-third of the silk used in the world is said to be artificial.

## U. S. ACT IS SUICIDE CAUSE

Japanese Found Dead in Streets; Protests Exclusion

Tokio, May 31.—An unidentified Japanese committed suicide in the streets near the ruins of the American embassy, destroyed in the earthquake and fire last September, as a protest against the enactment of the American immigration law excluding Japanese from the United States. The Japanese committed kara kari, with a short sword in the

measure prescribed by ancient custom.

Two letters were found on the body, one addressed to the American people and one to the Japanese people. The police retained the letters with out revealing their contents, but it is understood the one addressed to Americans condemned exclusion in exceedingly bitter terms.

## AGRICULTURE APPROPRIATION BILL ACCEPTED

Washington, May 31.—The conference report on the agricultural appropriation bill, carrying \$61,147,993 was adopted yesterday by the house. As originally passed in the house, the measure authorized \$56,583,743.

The report must be acted on by the senate.

As reported from conference the bill appropriates \$52,540, as proposed by the senate for enforcement of the packers and stockyards act, instead of \$226,770 as first written in by the house. The conferees agreed on a provision, replacing one inserted by the house and stricken out in the senate, stipulating that the secretary of agriculture may require reasonable bonds from registrants to secure the performance of their obligations, under the packers and stockyards act.

A cheese weighing 1 ton, 10 hundredweight and 2 pounds has been made in Australia for exhibition purposes.

Scarlet snow, due to the presence of small and very thin worms, has fallen at Halmsted, Sweden.

### Ship Is Sent by Parcel Post for Use in Africa

Shipbuilding has been reduced to a science so precise that it is now possible to construct vessels in such a manner that they may be taken to pieces, the parts shipped, and finally reassembled into a seaworthy craft at the destination. Each part is numbered and ticketed, and full instructions accompany it, a vital necessity, as the engineer is often compelled to make use of native labor, which always must be under his eye if he is to secure satisfactory results. The steamship "William MacKinnon," the first to be launched on Lake Nyanza, Central Africa, reached Mombasa by parcel post from England. Then the parts were transported through 500 miles of jungle to the lake, on the heads of 5,000 Kaffir porters. The boilers were dragged by oxen.

### Sparrows Defy Gas "Attack" in War on Bird Pests

Resisting the fumes of mustard gas, and other deadly chemicals in quantities that would have proved fatal to a human being, English sparrows and domestic pigeons survived gas "attacks" in recent tests conducted by the government to find a way to rid the country of various bird pests. The subjects were placed in tight compartments, so arranged that the observers could watch their actions. The gas was administered in varying quantities. Amounts that would have killed a soldier caused the specimens to evince little agitation, and they recovered when taken into fresh air. In all, six varieties of gas were tried but without the desired effect. The experiments emphasized the difficulties encountered in ridding the country of the English sparrow in particular.

One-third of the silk used in the world is said to be artificial.

The report must be acted on by the senate.

As reported from conference the bill appropriates \$52,540, as proposed by the senate for enforcement of the packers and stockyards act, instead of \$226,770 as first written in by the house. ### Muffling the Alarm Clock

It is sometimes desirable to muffle the alarm clock so that it awakens the sleeper without disturbing those in adjacent rooms. A stout rubber band will be found very useful for this purpose. It is snapped around the clock and over the bell as shown, whether the bell is located on top or on the back, and muffles the sound most effectively.

### High-Speed Telegraph Takes Thousand Words a Minute

Telegraphic messages at the rate of 1,000 words a minute have been received on a revolving magneto-drum instrument on display at a recent exhibit of the British Imperial College of Science and Technology. The current, passing through coils, converts a rapidly revolving iron drum into a magnet for a brief space, attracting a syphon tube charged with ink. The dots and dashes are recorded on the paper tape as the drum flies past. Wireless apparatus that could receive 300 words a minute was also displayed.

### Cleaning the Coffee Percolator

Coffee percolators occasionally become clogged and all efforts to open up the fine holes by scrubbing and washing are usually futile. A good method of doing the work is to hold the percolator in a gas flame for a few minutes and then tap it lightly; this will open all the holes at once. Obviously, this is much better than attempting to prick the holes open with a needle.

The report must be acted on by the senate.

## ST. JOSEPH'S IN MANDAN TO BE CONSECRATED

Sermons Will be Delivered in Four Different Languages Next June 4

Consecration services of St. Joseph's church, Mandan, will take place June 4. The program opens at 6:30 a. m. June 4, with vesting of the clergy officiating at the consecration. At 7 a. m. will be a procession to the church. The consecration ceremonies will include consecration of the exterior, the interior and the altars, procession of relics and pontifical high mass. There will be sermons outdoors, dinner at noon, and an open air concert at 3 p. m. by Father Slag's St. Mary's band of Bismarck.

At the same time the church is being consecrated there will be four sermons in four different languages—in the English language in front of the church, in the German in front of the rectory, in Bohemian at school corner, in Sioux Indian at the north-east corner.

Rev. Vincent Wehrle will be in charge of the consecration services, assisted by priests. Father Clement has been at the head of St. Joseph's church for 14 years.

As a part of consecration week, there will be a three days mission service, beginning Sunday, conducted by Franciscan Padres.

The most talkative character in all of Shakespeare's works is Hamlet, who has 1,569 lines to speak.

## Bismarck Physico-Electronic Laboratory

Lucas Block, Bismarck, N. D.

The late Dr. Albert Abrams advanced the theory that every disease has its particular vibrations, and, if counter vibrations of the same intensity are set in motion they would destroy the disease.

Dr. Abrams machine was never patented, and for this reason duplicates and improvements on his electronic machine are on the market.

Dr. Enge, after careful study of the different machines has selected and installed the latest and most scientific Electronic Machine on the market.

## CUBS BEAT PITTSBURGH

Vic Kenne Pitches Good Ball For National League Team

Chicago, May 29.—Vic Kenne pitched pretty ball for the Chicago Cubs yesterday against the Pittsburgh Pirates, and the Cubs took the game, 5 to 4. Chicago hit Mori on an opportunely behind bases on balls.

Boston made it three out of four from Philadelphia, taking the game 5 to 4. Manager Fletcher of Philadelphia was put off the field, Mori's hand was injured on the leg and inning and Mudgett replaced him.

In the American Detroit took a long contest from the St. Louis Browns, played in Detroit on a chilly day. The score was 14 to 7, and the Browns used five pitchers while the Browns used two. The game stretched over 2 hours and 44 minutes. St. Louis pitchers gave away bases on balls, but one batsman made on wild pitch and one ball.

## IOWAN WILL COACH HERE

James H. Morrison, former Iowa State College football and basketball star, has been engaged to coach Bismarck high school athletic team next year. Morrison, who taught this year at Green, Iowa, and coached basketball in the Iowa high schools, in addition to coaching the teams, will be in charge of the football and basketball teams in the Ames institution, according to school authorities here. He will take up his position next fall.

## MRS. MALLORY IS BEATEN

Chiswick, England, May 29.—(By the A. P.) Miss Elizabeth Ryan, formerly of California, defeated Mrs. Mollie Bursdall Mallory, former American tennis champion, 6-2, 6-3, in the semi-finals of the Wimbledon tennis championship here today.

## MARKET NEWS

**ST. PAUL LIVESTOCK**  
South St. Paul, May 30. Cattle receipts 700. Generally steady. Quality plain. Top yearlings \$9.00. Bulk steers and yearlings \$7.50 to \$8.50. Fat stock \$4.00 to \$6.75. Canners and cutters \$2.50 to \$3.25. Bologna bulls \$4.50 to \$4.60. Stockers and feeders in light supply. Nominally steady. Calves receipts 800. Quality considered. Veal calves 25 cents lower. Best lights to packers \$7.50.

Hog receipts 5,500. Fairly active, mostly steady to 10 cents higher. \$7.00 paid sparingly for strictly choice, light medium hogs. Bulk mixed light butchers \$6.90. Lower grades downward to \$6.75. Packing sows \$6.10 to \$6.25. Best feeder pigs \$5.75. Killers around \$6.00.

Sheep receipts 100. Steady. Best spring lambs \$16.00. Lightweight shorn ewes up to \$7.25. Heavy shorn \$6.50. Few woolled ewes \$7.75 to \$8.00.

The grain is the most kept. Mixed species of all bears.

Cook by Electricity.  
It is Cleaner.

## OFF FOR A NEW RECORD

They're off again today in the annual maddening race to hang up a new motor racing record at the Indianapolis Motor Speedway. This is how a passing driver looks to the crowd in the stands. The driver happens to be A. E. Moss in a Barber-Warlock Special.

## HURTS FATAL TO VETERAN

Crushed Under Hoofs of a Runaway Team

Valley City, N. D., May 29.—A man crushed beneath the hoofs of a runaway team and the wheel of a load of hay, Edward, 26-year-old son of Mr. and Mrs. Tim Ward, of this city, fought off death, which he had come face to face with down of times on the battlefields of France while serving with the 90th division during the World War, passed away thirty-eight hours later when he lost his greatest battle of all, with internal injuries sustained on Monday afternoon.

Edward, in company with his brother John, had loaded two hay racks with hay and were passing through the farm yard of Stephen Noyon, 17 miles north of the city. The boys alighted from their loads to stop at the Noyon farm yard for a few minutes. Edward standing between the two loads. The team was directly back of the other and, for some unknown reason, the back team started running. The unfortunate man fell, and the leading team as far as the gate where he realized he must lie or be crushed against one of the gate posts.

Not realizing that the other team was rushing down upon him and before he could escape being hit, the horses trampled him to the ground, the wagon passing over his body.

Rushed into the Noyon home where he was given first aid, the young man appeared not to be suffering any serious injuries. On Tuesday morning, however, it was evident that he suffered from internal injuries and the attending physician, Dr. J. Van Houten, done everything possible to ward off the inevitable result of the accident. Edward appeared to be in great pain on Tuesday and at 7 o'clock yesterday morning passed away.

Besides wife and infant son, the deceased leaves to mourn his untimely death, two brothers and one sister together with his parents.

## SAYS U. S. MUST BE WILLING TO GIVE FOR PACT

(Continued from page 1)

of the International Justice, with certain conditions. The suggestion has already had my approval on that point. I should not oppose other reservations, but any material changes which would not probably receive the consent of the many other nations, would be impracticable.

**Must Have Broad View**  
"Only one conclusion appears to me possible. We shall not promote our welfare by a narrow and shortsighted policy."

"That action which in the long run is for the advantage of the individual, as it is for the support of our union, is best summed up in a single word—renunciation. It is only by surrendering a certain amount of our liberty, only by taking on new duties and assuming new obligations, that we make that progress which we characterize as civilization. It is only in like manner that citizens and the state can maintain our federal union and become partners of its glory. That is the answer to every herald of discontent, and to every preacher of destruction. While this is understood, American institutions and the American union are secure."

"It must be remembered that our Republic was organized to avoid and discourage war, and to promote and establish peace. It is not a nation of blood and iron, and it is not a nation of war. The ways of our people are the ways of peace. They naturally seek ways to make peace more secure."

**Not Courting Disaster**  
"It is not to be inferred that it would be anything less than courting national disaster to leave our country barren of defense. Human nature is a very constant quality. While there is justification for hoping and believing that we are moving toward perfection, it would be absurd to assume that we have already reached it. We cannot disregard history. There have been and will be domestic disorders. There have been and will be tendencies of one nation to encroach on another. I believe in the maintenance of an army and navy, not for aggression, but for defense, but I am opposed to every kind of military aggression and to all forms of competitive armament. The ideal would be for nations to become parties to mutual covenants limiting their military establishment and making it obvious that they are not maintained to menace each other. This ideal should be made practical as fast as possible."

**Not a Peril**  
"While there are those who think we would be exposed to peril by adhering to this pact I am unable to attach great weight to their arguments. Whatever differences, whatever perils exist for us in the world

will come anyway whether we oppose or support the court. I am one of those who believe we would be safer and that we would be meeting our duties better by supporting it and making every possible use of it. I feel confident that such action would make a greater America, that it would be productive of a higher and more national spirit and a more complete national life.

"It is these two thoughts of union and peace which appear to me to be especially appropriate for our consideration of this day. Like all else in human experience they are not things which can be set upon and have an independent existence. They exist by reason of the concrete actions of men and women."

**A Greater Country**  
"Here on this, would emanate, overlooking the capital of the country for which they fought, many of the supporters of our institutions, holding the common venerable of a grateful people. The heroes of other wars were with them and in a great place of prominence lies one whose identity is unknown, save that it was a soldier of this Republic who thought that its ideals, its institutions, its liberties might be maintained among men. A grateful country holds all these services as its most precious heritage to be cherished for evermore."

"We can testify to those opinions, not by our words but by our action. Our country cannot exist on the remembrance of the heroic souls of the past. Public service, from the action of the humblest voter to the most exalted office, cannot be made a mere matter of hire and salary. The supporters of our institutions must be inspired by a more dominant motive than a conviction that their actions are going to be profitable. We cannot lower our standards to what we think will pay, but we must raise them to what we think is right."

## BONUS SERVICE PLAN IS TOLD

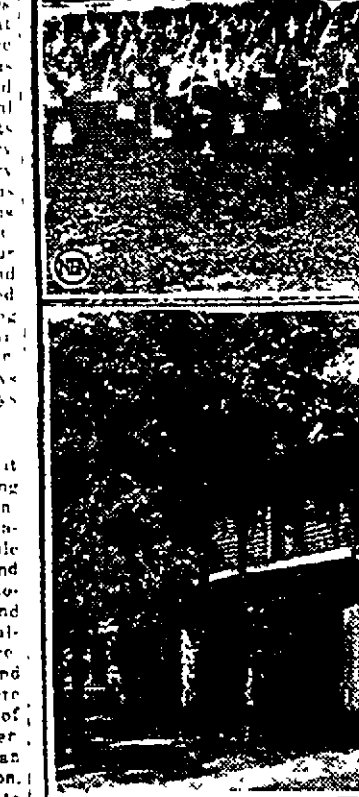

New Department Is Created By Director Hines

The creation of an Adjusted Compensation Service, with Major O. W. Clark in charge, is announced by General Frank T. Hines, director of the United States Veterans Bureau.

The new service will handle all the duties falling on the Veterans Bureau as the result of the passing of the Adjusted Compensation Act. It will be charged with issuing the adjusted service certificates and making the cash payments called for by that act.

Director Hines has estimated that \$127,000,000 will be expended by the Veterans Bureau under the Act the

## HERE'S WHERE MEMORIAL DAY CUSTOM ORIGINATED

TOP CEMETERY AT COLUMBUS, GA., WHERE FIRST MEMORIAL DAY EXERCISES WERE HELD BOTTOM, HOUSE WHERE FIRST MEMORIAL ASSOCIATION WAS FORMED.

The nation-wide custom of setting aside one day in the year for decorating the graves of the soldier dead originated among a little group of women who met at the home of Mrs. John Tyler in Columbus, Ga., on April 26, 1868.

The first Ladies' Memorial Association was organized at this meeting, and the women went from Mrs. Tyler's home to Linwood Cemetery in Columbus, where the original Memorial Day exercises were held.

This figure was submitted to the Director of the Budget yesterday. It is estimated that the first year will total \$1,183,000. Approximately \$8,000,000 will be needed for cash payments.

General Hines stated that he expected to utilize the present organization of the Veterans Bureau in the field to the fullest extent possible in carrying out the provisions of the Adjusted Compensation Act. He advised all veterans to keep in touch with their local post offices and with service organizations and newspapers in order that they might learn exactly how to proceed in getting their claim taken care of. The details of procedure have not as yet been approved.

## AUTHOR GUEST IN BISMARCK

David Grew, Writer of Many Western Stories, Visitor

David Grew, author of a number of highly successful stories of the Northwest, on his way to Northern Canada is visiting with his sister, Mrs. Ira C. Frandberg of Bismarck.

Mr. Grew's best known story of the Northwest, "Beyond Rope and Fence," is a book which has had a phenomenal success in England, France, and Holland as well as in the United States and Canada. This is hailed as another "Call of the Wild." In most of the states of the Union it has been accepted by the state reading circles and in the cities of Boston and New York it has just been accepted for the schools as a supplementary reader.

"The Two Coyotes," Mr. Grew's second story of the Northwest has just been published here and in Europe. The book like "Beyond Rope and Fence" is a story of life on the great prairies.

Mr. Grew who was brought up on the prairies of North Dakota loves the West as it really is and has made it his aim to tell about it truthfully so as to destroy the ludicrous conception that the easterners have acquired of it by reading the sensational, blood and thunder stories that have had such a wide market in the past. He says they think out East that all through the West, Dakota not excepted, men live by raising cattle and stealing them from each other, doing so with the ceaseless companionship of war-like gun fire.

## PULL TOGETHER SPIRIT IS BIG NEED OF STATE

M. M. Goodwill of Northern Pacific Advocates North Dakota "Daily Half Dozen"

## COOPERATION IMPORTANT

North Dakota citizens must pull together, for their benefit and for the benefit of their state, M. M. Goodwill, assistant to the vice-president, Northern Pacific Railway, told the North Dakota Retail Merchants here yesterday.

He urged a "daily half-dozen" for North Dakotans as follows: Optimism, Confidence, Enthusiasm, Common Sense, Hard Work and Cooperation. Speaking on cooperation he said:

"Never was cooperation more essential than now. All progress has sprung from it. Cooperation has displaced the prairie schooner by the steel train; it has displaced the canoe by the ocean liner; it has displaced the scythe and the sickle by the reaper and binder; it has displaced the town crier by the daily newspaper. The Northwest has been developed by cooperation and its future development depends upon the same kind of team work. Business men cannot pull one way and farmers another; nothing can be gained by attacking and destroying railroads or any other vital industry. Farming, transportation, business, working together, create prosperity and progress."

"Under the head of cooperative advertising, many suggestions may be made. I would like to urge all communities to issue, and have for sale, attractive picture postal cards, which tourists, visitors and home people can mail out to the world. Today in North Dakota there are very few mailing cards of this kind, which do the state justice, which really represent favorable publicity. The mailing card situation is easy to work out, with the help of your local photographers, professional or amateur, plus the application of a state standard or uniformity of design."

Mr. Goodwill also proposed plans

## How many chances of fire in your home?

You don't know. But there are a great many chances—too many with which to gamble. Why not let the insurance company take the risk? Insurance costs but a very little and if fire comes, your policy may mean your salvation. There is no better protection than the sound indemnity of dependable fire insurance. Let this agency tell you about it. You will be under no obligation. Better insure in the Hartford Fire Insurance Company.

## MURPHY

"The Man Who Knows Insurance"

Bismarck, N. D.

for cooperative advertising with radio, letter agents, envelope stickers, moving pictures and public meetings.

"Your Rotary, Lions, Kiwanis, Commercial and other clubs can take lessons from pioneers," he said. "Why don't you bring a few of the early settlers from your town into one of your meetings some day to tell you the inspiring story of early days in this state and the story of their own successes. Much can be learned from the past. We owe more than we can repay to our pioneers."

## CITY'S FIRE FUND GAINS

Will Receive \$1,735.18 From Tax Distribution

The State's auditor's office will distribute \$40,320.96 to 384 fire departments of state, from the fund created by a levy of two percent tax on foreign fire insurance companies, according to D. C. Foldexter, state auditor. The tax is returned to cities in proportion to premium receipts from them. Payments will include Fargo \$6,988.33; Grand Forks \$2,547.33; Minot \$2,144.33; Bismarck \$1,735.18; Jamestown \$1,472.88; Devils Lake \$1,231.28; Valley City \$865.22; Mandan \$852.22.

The distribution is made each year to organized fire departments, and is an aid in maintenance of the departments in many towns.

Boil city water for the next three weeks.

Dr. Stackhouse, City Health Officer.

## VALLEY CITY COUPLE CELEBRATE GOLDEN WEDDING

Valley City, May 30.—Mr. and Mrs. Carl Thiel, Sr., celebrated their golden wedding anniversary Sunday at the farm home of their son Carl, Jr.

Rev. J. F. L. Bohannon attended and reunited the couple. Mrs. Thiel is 71 and her husband 76. They were married in Germany and came to Barnes county many years ago taking up a homestead northeast of here on the Sheyenne river.

## Constipation is ruinous to children—keep yours healthy with Kellogg's Bran

Constipation undermines a child's health. It saps his energy and makes him listless. It can lead to more than 40 other serious diseases. Mothers should take immediate steps to remove, safely and surely, the dangerous poisons from his system.

Kellogg's Bran—because it is ALL bran—brings permanent relief. Nothing but ALL bran can be 100 per cent effective. That is why Kellogg's Bran, cooked and krumbled, is universally recommended by doctors. They know it brings results.

If eaten regularly, Kellogg's Bran is guaranteed to give permanent relief in the most chronic cases of constipation, or your grocer returns your money. Kellogg's Bran acts on the intestines exactly as nature acts. It sweeps and cleans and purifies them. It makes them function naturally and regularly. It allows you to discontinue forever the use of harmful, habit-forming drugs and pills.

Kellogg's Bran, cooked and krumbled, is a delightful surprise to the taste—particularly if one has tried ordinary unpalatable bran. Kellogg's Bran has a delicious, crisp, nutlike flavor—an exclusive flavor. It is most enjoyable with milk or cream, sprinkled over other cereals or cooked with hot cereals. Try it in bread, muffins, griddle cakes and other recipes given on every package.

Have your children eat it regularly—two tablespoons daily—in chronic cases, with every meal. Kellogg's Bran is made at Battle Creek and sold at all grocers. It is served in individual packages by the leading hotels and clubs. Ask for it at your restaurant.

## The Zenith Coaster ROAD TESTED

**Free! Free!**

**TO BOYS AND GIRLS**

who would like to own a Zenith Road-tested Coaster—the best coaster wagon in the world—we will send free of charge on receipt of your request, a dandy Zenith coaster cap, and also tell you how you can get a Zenith coaster for your very own.

Every Zenith has its own license plate. You can always spot your wagon by its number.

## MARKET NEWS

LIVESTOCK IN  
HARD SLUMP IN  
WEEK'S TRADES

Most Severe Decline in Prices  
of the Season Occurs at  
So. St. Paul

IS SOMEWHAT RESTORED

So. St. Paul, May 31. (By the A. P.)—All classes of livestock suffered one of the most severe slumps of the season early this week and late last week, hogs declining 55 to 60 cents between Tuesday of last week and Wednesday of this week, says the weekly review of the United States Department of Agriculture.

Cattle lost 25 to 50 cents during the week. Steers and yearlings suffered the maximum of fully 50 cents while she-stock declined 25 to 50 cents. Canners and cutters and hog-bone butchers evidenced little change but stockers and feeders met a narrow country demand and followed in line with the fat stock. Sheep suffered slight losses which were largely recovered, the week's close being about 25 cents lower than a week ago.

Hog values were restored somewhat on later sessions, the last two days recording an advance of 15 to 25 cents over the week's low time. Bulk of the desirable grades of butcher and bacon hogs closed at 6.90 with a few loads of sorted hogs and butchers at the top price of 7.00. Less desirable grades were saleable at 6.85 and below, packing sows 6.10 to 6.25 and feeder pigs 5.75.

What was probably the best load of cattle was sold this week, 23 head of 1,010 pound long yearlings scoring 10.75, these being of recent sale at around 11.00. The recent high time. Bulk of steers and yearlings found outlet at 7.50 to 8.75, with most fat cows 4.00 to 5.25, and up to 7.00 for heifers. Canners and cutters still turned within a 2.50 to 3.25 spread, hog-bone butchers 4.25 to 4.50. Stockers and feeders were most common at 2.50 to 7.00. Veal calves closed at 7.50 for the bulk. Sheep and lambs are quotable about 25 cents lower than a week ago. Best spring lambs 16.00 today, bulk of clipped lambs 11.00 to 13.50. Best lights and handweights fat ewes turned at 7.25, heaviest cut at 5.50. Cattle receipts today were 50; hogs 500. No sheep were received.

WHEAT PRICES  
LITTLE LOWER

Rains in the Southwest De-  
pressing Factor

Chicago, May 31. (By the A. P.)—Despite considerable evening up by shorts in the May delivery, wheat prices averaged lower today during the early transactions. The selling side was favored on account of further rains in the Southwest. Prospects regarding farm legislation at Washington were also construed at bearish. Initial figures, which ranged from 3-8 cents decline to 1-2 advance, with July \$1.07-1-2 to 5-8 cents to \$1.07-3-4 and September \$1.08-5-8 to \$1.08-3-4, were followed by a general decline to below Thursday's finish.

Subsequently weakness of the Winnipeg market led to rather heavy selling here and to a material drop in values. The close was weak, 1-2 to 1-4 net lower, July \$1.06 and September \$1.07-1/2 to \$1.07-3/4.

MINNEAPOLIS FLOUR  
Minneapolis, May 31.—Flour unchanged. Shipments 44,576 barrels. Bran \$17 to \$18.

MINNEAPOLIS GRAIN  
Minneapolis, May 31.—Wheat receipts 356 cars compared with 173 cars a year ago. No. 1 northern \$1.12-1/2 to \$1.17-3/4; No. 1 dark northern spring choice to fancy \$1.12-1/2 to \$1.32-1/4; good to choice \$1.19-1/2 to \$1.25-1/4; ordinary to good \$1.14-1/2 to \$1.18-1/4; May \$1.12-1/4; July \$1.12-1/4; September \$1.11-1/4; corn No. 3 yellow, 70c to 70-1/2c; oats No. 2 white, 44-1/2c to 44-3/4c; barley 59c to 71c; rye No. 2, 62-1/2c to 63-1/2c; flax No. 1, \$2.37 to \$2.41.

CHICAGO LIVESTOCK  
Chicago, May 31.—Hog receipts 13,000. Desirable kind strong to five cents higher. Top \$7.50.  
Cattle receipts 3,000. Compared to a week ago all grades and weights of steers active. 15 to 25 cents higher. Extreme top matured steers \$11.50.  
Sheep receipts 5,000. Market generally steady. Top fat lambs for week \$15.00.

FROSTED FLAX  
REPORTS MADE  
TO AG COLLEGE

H. L. Bolley, Botanist, Reports  
That Killings Generally  
Not Completed

STANDS HEAVY FREEZE

Fargo, N. D., May 31.—Reports of frosted flax have been received by H. L. Bolley, botanist of the Experiment station at the North Dakota Agricultural college. "Generally the reports are that the killing is not complete and the correspondents want to know whether frosted flax will come on," Mr. Bolley states. "We have in previous years and particularly this season made a number of careful counts on records on the action of the frost on early plantings here on the Agricultural college grounds."

Generally speaking, young flax stands heavy freezing in spring, if it happens to be four or five or more days old at the time of the frost. A frost of 28 to 34 degrees which happens at the time when the flax is not more than two or three days old is apt to kill a high percentage of young flax plants. If a young flax plant is frozen off at or near the growing line below the two seed leaves, if this is killed, the flax cannot come on farther.

"No doubt a great many people have noticed a certain amount of killing in the field and many of them are anxious to know whether the plant will live after the top is frozen off. The proper answer is as above. The more important question to the grower is how many plants remain after the frost. Many farmers plant much more seed than is necessary to make a stand on a good seed bed. If the flax is just coming up and some of it is killed, it will be well to wait a few days to see how much more comes up. That which is under ground will usually not be injured."

"One of the usual observations made on spring freezing of flax is that the killing is not done regularly. The frost seldom kills all of the plants in a drill row. It is a quite common observation that a plant is taken here and there. One plant may be frozen dead while other plants near and of the same age remain apparently uninjured. There is no easy explanation of this phenomenon. It is probable that the plants that do not die from the frost have the roots and cellular structures more properly functioning than the plants which are killed. Under frost conditions it is quite essential that the roots be able to rapidly absorb moisture from the soil. Otherwise the young plants will die at once when they thaw out."

"Quite a few will be interested to know whether they should re-seed. If the flax was practically all up and the frost was heavy enough to kill the tops of all of the plants, it is evident that it will need to be re-seeded. If the killing is intermittent, a good method is to use a yard stick on a number of drill rows in different parts of the field and count the living plants in a yard of drill row. If the ground is well prepared and free from weeds, and there yet remains an average of a plant per inch, it is safe to say that the crop will, under normal weather conditions, come through for a good stand. Generally speaking, there should be some two or three plants per inch of drill row."

KILLED DURING  
CLASS RUSH

Annapolis, Md., May 31.—Thrown overboard from the seawall at the naval academy by classmates in an annual frolic, Midshipman Leicester P. Smith, Kent, Ohio, was killed yesterday afternoon. It is believed he was struck on the head by the mast of a small sail boat which overturned just after he was thrown in.

For years it has been the custom for members of the second class to throw each other overboard on the occasion of receiving their class rings. This custom was being carried out in the usual way yesterday. Young Smith was among the number who was thrown over with a large number of others.  
At the end of an hour's futile effort to resuscitate him he was pronounced dead.

A board of officers has been appointed by Admiral Wilson, superintendent of the academy, to investigate the affair, which, however, is regarded as purely accidental.

RECORDS MADE  
BY A. C. HERD

Fargo, N. D., May 31.—A production of 18,088 pounds of milk and 803 pounds of butter is the one-year record for Dakota Johanna Ormsby 2nd of the North Dakota Agricultural college Holstein herd. This is just a little less than the state record which is 25,824 pounds of milk and 1,223 pounds of butter a year.

Following are the records of some of the individual cows in the North Dakota Agricultural college herds which ranged high in production for the past year:  
Dakota Johanna Ormsby 2nd with 18,088 pounds of milk and 803 pounds of butter; Miss Hengerveld Champion, 3-year-old, with 14,708 pounds of milk and 655 pounds of butter; Nacole Queen, 2-year-old, with 13,926 pounds of milk and 579 pounds of butter. These are all Holsteins.

In the Guernsey herd are: Golden Miami of Jean Du Luth, 2-year-old, with 9,798 pounds of milk and 514 pounds of butterfat or 643 pounds of butter; and Nacole Cherub Martha, senior, yearling, with 7,547 pounds of milk and 395 pounds of butterfat or 485 pounds of butter.

WOULD REDUCE  
PRISON TERM

Ward County States Attorney  
Recommends McCrell  
Clemency

Minot, N. D., May 31.—A recommendation that a communication of the life sentence of Tom McCrell, now serving time in the state penitentiary at Bismarck for murder, be made but that no pardon or parole be granted at this time, has been forwarded to the state pardon board by Assistant States Attorney O. B. Herigstad of Minot.

Mr. Herigstad, in expressing opposition to a pardon at this time, expresses the belief that McCrell has not been sufficiently punished for the crime which he was imprisoned for—that of slaying Ernest Thompson, Ward county jailor—but that he believes a life sentence is too severe and therefore would recommend a commutation of it.

Mr. McCrell, who is barely past his majority in life, was sentenced to life imprisonment from Ward county four years ago, following the killing of Jailor Thompson, the actual slaying of whom was done by Ward McCrell, a brother of the youth Tom McCrell, the evidence showed, handed a gun thru the bars of the jail to his brother, who in effecting an escape, killed Thompson when the latter attempted to intercept him. Ward McCrell is also serving a life sentence in the state penitentiary.

The last session of the state legislature enacted legislation which would enable the younger McCrell to make immediate application for a pardon or commutation of his sentence without being obliged to serve the statutory period of time before making such application.

German Baptist Church  
Corner 8th and Rossier.  
G. Sprock, Pastor.  
11 a. m. morning service. The subject being "The Song of the Redeemed Hosts."  
7:30 p. m. Children's Day program. Everybody invited.

Junior Sabbath School will meet at 9:30. All other departments will meet at 12m.

The Christian Endeavor will meet at 7:00 o'clock. Subject, "How Jesus Faced Duty."

The evening service begins at 8 o'clock. The pastor will talk about the General Assembly which just closed on Thursday. This has been a year of controversy but has ended auspiciously. The usual godo music will be provided.

The session will hold its regular meeting on Tuesday evening at 8:00 o'clock at the manse.

Prayer meeting Wednesday at 8 p. m.

Scouts go to Canada camp

Local Boys Will Go To Carlyle Lake For Stay

Monday noon the Bismarck Boy Scouts with Scout Master Fred Hanson and J. J. MacLeod will leave for Carlyle Lake, Saskatchewan.

Last fall a trip was promised the Scouts who made special effort to work up Scout craft during the winter. About thirty boys qualified for the trip. The American Legion, greatly interested in the Scouts, supplying the gas and oil for the cars.

It is planned to leave Bismarck at noon and to spend the night in Minot, which is about half way. This will enable the boys, if all goes well, to arrive at the resort Tuesday afternoon in time to get set up for the stay there.

Scouts from Williston and Bowbells will be in camp at Carlyle at the same time so the Bismarck boys are looking forward to a splendid time. All that is needed now is good swimming weather.

PINNED DOWN  
BY PONY'S BODY

Dickinson, N. D., May 31.—When Leo, aged 15, son of R. C. Ench, living near Leith, failed to return after having gone after the dairy cows, search was instituted and he was found unconscious lying pinned down by his saddle horse. The horse had stumbled and broke its neck, pinning the boy down and knocking him out. He did not remember the fall or know how long he had been lying in his helpless condition. He was unhurt.

GRAND JURY TO  
TAKE UP CASE

St. Paul, May 31.—The case of Herbert H. Bigelow, head of Brown and Bigelow, St. Paul specialty manufacturing concern, charged with defrauding the government of more than \$150,000 by making fraudulent income tax returns, will be presented to a federal grand jury Tuesday when the June term of United States district court opens in St. Paul.

Mr. Bigelow, Robert Galloway, treasurer of the firm, and William F. Priester, its comptroller, have all been served with a criminal complaint issued by Lafayette French, United States district attorney, in connection with the case.

Sons of Millionaires,  
Both Students  
Admit Crime

(Continued from page 1)  
chisel and then thrust a gag in his mouth, strangling him.  
Loeb Later Collapses  
Young Loeb collapsed in a faint when identified today by Mrs. Gertrude Bay street, as having conspired there with Leopold on May 22—the day after the killing and used the telephone. He was rushed to a hospital.

Leopold, however, showed no discomfort when he and Loeb were taken to the cigar store which also has a lunch counter.  
"Let's eat," he said, and ordered a sandwich, pie and coffee.  
Mr. Crowe declared the entire kidnapping and killing had been executed according to a carefully prearranged plan.

The boy was killed in the rented automobile on a heavily traveled street and within a few blocks of the spot where he was lured into the car. He resisted them and was struck on the head with the chisel and then gagged, Mr. Crowe said.

With the body on their hands, they had used acid in an attempt to disguise it beyond recognition and then stripped it of clothing in the lonely spot where it was taken, Prosecutor Crowe asserted. Even either had been provided by the kidnapers as a precaution to overpower resistance.

While the boys were telling yesterday somewhat glib but apparently frank stories of their movement on May 21 and of their past activities, the police were almost won to their side. The boys frankly said the circumstances looked bad against them.

For Sale—Choice Canarie Singers, Imported German Rollers, Jacob Bull, Dickinson, N. Dak., Box 728.

SPEED RECORD  
OF BIRTHS AND  
'DEATHS IN N. D.

State Department of Health  
Seeks Admittance Into  
U. S. Rating

The State Department of Health is putting on an intensive campaign for 100 percent birth and death registration for the purpose of being admitted to the Registration Area of the United States.

We believe North Dakota is the healthiest and best place in this world to live. We cannot prove this until our statistics are accepted as complete, reliable and authentic. Admittance to the Registration area will do this," says Dr. A. A. Whittemore.

Birth and death records are the most important legal document which we have. They prove parentage, age, legitimacy and citizenship. They may be necessary to obtain life insurance, mother's and widow's pensions, soldier's compensations, inherit property, obtain employment, attend school, obtain marriage licenses, passports, prove cause of death. They may be necessary to convict criminals, prove innocence of crime. They are indispensable to health officers in determining the cause of death and the combating of disease, etc.

"No mother can afford to do her child the injustice of neglecting this important detail of the birth of her child."

The test will be made by a government expert for the months of June, July and August. We are striving for 100 percent registration during these three months."

How Noted Alienist  
Constructed Mind  
Picture

(Continued from page 1)  
back, and the facts show this crime was planned carefully, he would pick out a boy who was sort of woozy to begin with, Robert was too well educated, alert and combative.

"I believe the motive was money, inspired by a brooding hatred. Jacob Franks, the father, is a rather autocratic, unrelenting successful business man. His heart was wrapped up in the boy."

"Probably someone lost money in dealing with Franks, or felt injured in some other way. He nursed his resentment and decided to make him pay. That would have been the course of a paranoiac such as I have described."

"I do not think it was mere boldness, antagonism toward wealth. The person wanted money and at the same time wanted to hit the father where he would feel it."

"Murder was not intended. But the boy put up such a fight that great force was required to keep him quiet, and he died."

"There is another possibility, according to Dr. Krohn, which would bring more than a single criminal into the case."

"When a woman is possessed with

## WAS A LABORER

Life played strange pranks on Tom Ashburnham. He was a soldier when young. Once he worked as a laborer in Fredericton, Canada. He married the Fredericton telephone operator. Then he inherited the title of Earl of Ashburnham and estates. This picture was taken as he sailed for England to visit his estates. While across the Atlantic he died.

"carelessness," she is almost insane," he says.

"Suppose a man keeps repeating to his wife the wrongs he thinks he suffered from Jacob Franks. He dies and his troubles increase. She becomes infuriated against Franks and decides to wreak vengeance."

"A woman can always get some duh of a man to help do anything, and they might have done this."

PIONEER DIES  
Fort Yates, N. D., May 31.—Tom Twigg, one of the pioneers of the reservation country, died at Fort Yates Thursday of last week and was buried there Saturday. He was about 80 years of age and came west as a soldier with Gen. Custer. He was discharged from the army before the battle of the Little Big Horn, and located first on the east side of the river. Later he moved on the Cannon Ball river where he ranched for many years. For some time he had made his home at Fort Yates, where two daughters, Mrs. Jamerson and Mrs. Evans reside. Another daughter is Mrs. Godfrey of Wakpala.

MCKENZIE HOTEL  
Monday June 2.  
Office Hours: 10 a. m. to 4 p. m.

ONE DAY ONLY  
No Charge for Consultation  
Dr. Mellenthin is a regular graduate in medicine and surgery and is licensed by the state of North Dakota. He does not operate for chronic appendicitis, gall stones, ulcers of stomach, tonsils or adenoids.

He has to his credit wonderful results in diseases of the stomach, liver, bowels, blood, skin, nerves, heart, kidney, bladder, bed wetting, catarrh, weak lungs, rheumatism, sciatica, leg ulcers and rectal ailments.

Below are the names of a few of his many satisfied patients in North Dakota:  
Mrs. Berndt Amundson, Sharon, N. Dak., anemia.  
Mrs. A. C. Johnson, Manville, N. Dak., varicose ulcer.  
T. K. Walsvik, Hatton, N. Dak., ulcer of the stomach.  
Mrs. Andy C. Schmuher, Mylo, N. Dak., gall stones.  
W. R. Thomas, Grafton, N. Dak., liver trouble.  
Mrs. Cuto Johnson, Grand Forks, N. Dak., lung trouble.

Remember above date, that consultation on this trip will be free and that his treatment is different.

Married women must be accompanied by their husbands.  
Address: 211 Bradbury Bldg., Los Angeles, California.

## LIVESTOCK IN HARD SLUMP IN WEEK'S TRADES

Most Severe Decline in Prices of the Season Occurs at So. St. Paul

IS SOMEWHAT RESTORED

So. St. Paul, May 31 (By the A. P.)—All classes of livestock suffered one of the most severe slumps of the season early this week and late last week, huge declines 55 to 60 cents between Tuesday of last week and Wednesday of this week, says the weekly review of the United States Department of Agriculture.

Cattle lost 25 to 50 cents during the week. Steers and yearlings suffered the maximum of fully 50 cents while she-stocks declined 25 to 50 cents. Canners and cutters and bullock bulls evidenced little change but stockers and feeders met a narrow country demand and followed in line with the fat stock. Sheep suffered slight losses which were largely recovered, the week's close being about 25 cents lower than a week ago.

Hog values were restored somewhat on later sessions, the last two days recording an advance of 15 to 25 cents over the week's low time. Bulk of the desirable grades of butcher and bacon hogs closed at 6.90 with a few loads of sorted lights and butchers at the top price of 7.00. Less desirable grades were salable at 6.85 and below, packing hogs 6.10 to 6.25 and pigs 5.55.

What was probably the best load of cattle was sold this week, 23 head of 1,000 pound long yearlings scoring 10.75, these being of quality to sell at around 11.00 at the recent high time. Bulk of steers and yearlings found outlet at 7.50 to 8.75, with most fat cows 4.00 to 5.25, and up to 7.00 for heifers. Canners and cutters still turned within a 2.50 to 3.25 spread, bullock bulls 4.25 to 4.60. Stockers and feeders were most common at 5.50 to 7.00. Veal calves closed 2.50 for the bulk.

Sheep and lambs are quotable about 25 cents lower than a week ago. Best spring lambs 10.00 today, bulk of clipped lambs 11.00 to 13.50. Best lights and handyweight fat ewes turned at 7.25, heavy cut at 5.50. Cattle receipts today were 50; hogs 500. No sheep were received.

# WHEAT PRICES

## LITTLE LOWER

Rains in the Southwest Depressing Factor

Chicago, May 31 (By the A. P.)—Despite considerable evening up by shorts in the May delivery, wheat prices averaged lower today during the early transactions. The selling side was favored on account of further rains in the Southwest. Prospects regarding farm legislation at Washington were also construed at bearish. Initial figures, which ranged from 3-8 cents decline to 1-2 advance, with July \$1.07 1/2 to 5-8 cents to \$1.07 3/4 and September \$1.08 5/8 to \$1.09 3/4, were followed by a general decline to below Thursday's finish.

Subsequently weakness of the Winnipeg market led to rather heavy selling here and to a material drop in values. The close was weak, 1/4 to 1 1/2 net lower, July \$1.06 and September \$1.07 1/2 to \$1.07 3/4.

# MINNEAPOLIS FLOUR

Minneapolis, May 31.—Flour unchanged. Shipments 44,576 barrels. Bran \$17 to \$18.

MINNEAPOLIS GRAIN

Minneapolis, May 31.—Wheat receipts 356 cars compared with 173 cars a year ago. Cash No. 1 northern \$1.12 1/2 to \$1.17 1/2; No. 1 dark northern spring choice to fancy \$1.12 1/2 to \$1.17 1/2; good to choice \$1.14 1/2 to \$1.19 1/2; ordinary to good \$1.14 1/2 to \$1.18 1/2; May \$1.12 1/2; July \$1.12 1/2; September \$1.11 1/2; corn No. 3 yellow, 70c to 70 1/2c; oats No. 3 white, 44 1/2c to 44 3/4c; barley 59c to 74c; rye No. 2, 62 1/2c to 63 1/2c; flax No. 1, \$2.27 to \$2.41.

# CHICAGO LIVESTOCK

Chicago, May 31.—Hog receipts 13,000. Desirable kind strong to 50c cents higher. Top \$7.50.

Cattle receipts 3,000. Compared to a week ago all grades and weights fed steers active, 15 to 25 cents higher. Extreme top matured steers \$11.50.

Sheep receipts 5,000. Market generally steady. Top fat lambs for week \$15.00.

In China there is a strong movement among the new generation of girls against the custom of infant betrothals.	

# FROSTED FLAX REPORTS MADE TO AG COLLEGE

H. L. Bolley, Botanist, Reports That Killings Generally Not Completed

# STANDS HEAVY FREEZE

Fargo, N. D., May 31.—Reports of frosted flax have been received by H. L. Bolley, botanist of the Experiment station at the North Dakota Agricultural college. "Generally the reports are that the killing is not complete and the correspondents want to know whether frosted flax will come on," Mr. Bolley states. "We have in previous years and particularly this season made a number of careful counts on records on the action of the frost on early plantings here on the Agricultural college grounds."

"Generally speaking, young flax stands heavy freezing in spring, if it happens to be four or five or more days old at the time of the frost. A frost of 28 to 34 degrees which happens at the time when the flax is not more than two or three days old is up to kill a high percentage of young flax plants. If a young flax plant is frozen off at or near the ground line below the two seed leaves. If this is killed, the flax cannot come on further."

"No doubt a great many people have noticed a certain amount of killing in the field and many of them are anxious to know whether the plant will live after the top is frozen off. The proper answer is as above. The more important question to the grower is how many plants remain after the frost. Many farmers plant much more seed than is necessary to make a stand on a good seed bed. If the flax is just coming up and some of it is killed it will be well to wait a few days to see how much more comes up. That which is under ground will usually not be injured."

"One of the usual observations made on spring freezing of flax is that the killing is not done regularly. The frost seldom kills all of the plants in a drill row. It is a quite common observation that a plant is taken here and there. One plant may be frozen dead while other plants near and of the same age remain apparently uninjured. There is no easy explanation of this phenomenon. It is probable that the plants that do not die from the frost have the roots and cellular structures more properly functioning than the plants which are killed. Under frost conditions it is quite essential that the roots be able to rapidly absorb moisture from the soil. Otherwise the young plants will die at once when they thaw out."

"Quite a few will be interested to know whether they should re-seed. If the flax was practically all up and the frost was heavy enough to kill the tops of all of the plants, it is evident that it will need to be re-seeded. If the killing is intermittent, a good method is to use a yard stick on a number of drill rows in different parts of the field and count the living plants in a yard of drill row. If the ground is well prepared and free from weeds, and there yet remains an average of a plant per inch, it is safe to say that the crop will, under normal weather conditions, come through for a good stand. Generally speaking, there should be at least two or three plants per inch of drill row."

# KILLED DURING CLASS RUSH

Annapolis, Md., May 31.—Thrown overboard from the seawall at the naval academy by classmates in an annual frolic, Midshipman Leicester P. Smith, Kent, Ohio, was killed yesterday afternoon. It is believed he was struck on the head by the mast of a small sail boat which overturned just after he was thrown in.

For years it has been the custom for members of the second class to throw each other overboard on the occasion of receiving their class rings. This custom was being carried out in the usual way yesterday. Young Smith was among the number who was thrown over with a large number of others.

At the end of an hour's futile effort to resuscitate him he was pronounced dead.

A board of officers has been appointed by Admiral Wilson, superintendent of the academy, to investigate the affair, which, however, is regarded as purely accidental.

# RECORDS MADE BY A. C. HERD

Fargo, N. D., May 31.—A production of 18,038 pounds of milk and 803 pounds of butter is the one-year record for Dakota Johanna Ormsby 2nd of the North Dakota Agricultural College Holstein herd. This is just a little less than the state record which is 25,824 pounds of milk and 1,222 pounds of butter a year.

Following are the records of some of the individual cows in the North Dakota Agricultural college herds which ranged high in production for the past year:

Dakota Johanna Ormsby 2nd, with 18,038 pounds of milk and 803 pounds of butter; Miss Bengerveld Champion, 2-year-old, with 14,708 pounds of milk and 655 pounds of butter; Nacolee Queen, 2-year-old, with 13,925 pounds of milk and 679 pounds of butter. These are all Holsteins.

In the Guernsey herd are: Golden Miami of Jean Du Luth, 2-year-old, with 9,798 pounds of milk and 514 pounds of butter; and Macol Cherub Martha, senior yearling, with 7,247 pounds of milk and 296 pounds of butter; and 455 pounds of butter.

# WOULD REDUCE PRISON TERM

Ward County States Attorney Recommends McGrill Clemency

Minot, N. D., May 31.—A recommendation that a commutation of the life sentence of Tom McGrill, law serving time in the state penitentiary at Bismarck for murder, be made but that no pardon or parole be granted at this time, has been forwarded to the state pardon board by Assistant States Attorney O. R. Herge of Minot.

Mr. Herge, in expressing opposition to a pardon at this time, expressed the belief that McGrill has not been sufficiently punished for the crime which he was implicated that of slaying Ernest Thompson, Ward county jailor—but that he believes a life sentence is too severe and therefore would recommend a commutation of it.

Mr. McGrill, who is barely past his majority in life, was sentenced to life imprisonment from Ward county four years ago, following the killing of Jailor Thompson, the actual slaying of whom was done by McGrill, a brother of the youth Tom McGrill, the evidence showed, handed a gun thru the bars of the jail to his brother, who in effecting an escape, killed Thompson when the latter attempted to intercept him. Word McGrill is also serving a life sentence in the state penitentiary.

The last session of the state legislature enacted legislation which would enable the younger McGrill to make immediate application for a pardon or commutation of his sentence, without being obliged to serve the statutory period of time before making such application.

# SCOUTS GO TO CANADA CAMP

Local Boys Will Go To Carlyle Lake For Stay

Monday noon the Bismarck Boy Scouts with Scout Master Fred Hanson and J. J. MacLeod will leave for Carlyle Lake, Saskatchewan.

Last fall a trip was promised the Scouts who made special effort to work up Scout craft during the winter. About thirty boys qualified for the trip. The American Legion, greatly interested in the Scouts, is supplying the gas and oil for the cars.

It is planned to leave Bismarck at noon and to spend the night in Minot, which is about half way. The trip will enable the boys, if all goes well, to arrive at the resort Tuesday afternoon in time to get set up for the stay there.

Scouts from Williston and Bowbells will be in camp at Carlyle at the same time so the Bismarck boys are looking forward to a splendid time. All that is needed now is good swimming weather.

# PINNED DOWN BY PONY'S BODY

Dickinson, N. D., May 31.—When Leo, aged 12, son of R. C. Ench, living near Leith, failed to return after having gone after the dairy cows, search was instituted and he was found unconscious lying pinned down by his saddle horse. The horse had stumbled and broke its neck, pinning the boy down and knocking him out. He did not remember the fall or know how long he had been lying in his helpless condition. He was unhurt.

# GRAND JURY TO TAKE UP CASE

St. Paul, May 31.—The case of Herbert H. Bigelow, head of Brown and Bigelow, St. Paul, specialty manufacturing concern, charged with defrauding the government of more than \$150,000 by making fraudulent income tax returns, will be presented to a federal grand jury Tuesday when the June term of United States district court opens in St. Paul.

Mr. Bigelow, Robert Galloway, treasurer of the firm, and William F. Priester, its controller, have all been served with a criminal complaint issued by Lafayette French, United States district attorney, in connection with the case.

chisel and then thrust a gag in his mouth, strangling him.

Leopold, collapsed in a faint when identified today by Mr. Gertrude Bairish, owner of a cigar store on Wabash street, as having come there with Leopold on May 22—the day after the killing and used the telephone. He was rushed to a hospital.

Leopold, however, showed no discomfort when he and Leeb were taken to the cigar store which also has a lunch counter.

"Let's eat," he said, and ordered a sandwich, pie and coffee.

Mr. Crowe declared the entire kidnapping and killing had been executed according to a carefully pre-arranged plan.

The boy was killed in the rented automobile on a heavily traveled street and within a few blocks of the spot where he was lured into the car. He resisted them and was struck on the head with the chisel and then gagged, Mr. Crowe said.

With the body on their hands, they had used acid in an attempt to disfigure it beyond recognition and then stripped it of clothing in the lonely spot where it was taken. Prosecutor Crowe asserted. Even either had been provided by the kidnapers as a precaution to overpower resistance.

While the boys were telling yesterday somewhat of but apparently frank stories of their movement on May 21 and of their past activities, the police were almost won to their side. The boys frankly said the circumstances looked bad against them.

For Sale—Choice Canarie Singers, Imported German Rollers, Jacob Bull, Dickinson, N. Dak., Box 728.

# SPEED RECORD OF BIRTHS AND DEATHS IN N. D.

State Department of Health Seeks Admittance Into U. S. Rating

The State Department of Health is putting on an intensive campaign for 100 percent birth and death registration for the purpose of being admitted to the Registration Area of the United States.

We believe North Dakota is the healthiest and best place in this world to live. We cannot prove this until our statistics are accepted as complete, reliable and authentic. Admittance to the Registration area will do this," says Dr. A. A. Whitte.

Birth and death records are the most important legal document which we have. They prove parentage, age, legitimacy and citizenship. They may be necessary to obtain life insurance, mother's and widow's pensions, soldiers' compensations, absent property, obtain employment, attend school, obtain marriage licenses, passports, prove cause of death. They may be necessary to convict criminals, prove innocence of crime. They are indispensable to health officers in determining the cause of death and the combating of disease, etc.

No mother can afford to do her child the injustice of neglecting this important detail of the birth of her child.

The test will be made by a government expert for the months of June, July and August. We are striving for 100 percent registration during these three months."

# How Noted Alienist Constructed Mind Picture

(Continued from page 1)

back, and the facts show this crime was planned carefully. He would pick out a boy who was sort of woozy to begin with. Robert was too well educated, alert and combative.

"I believe the motive was money, inspired by a brooding hatred. Jacob Franks, the father, is a rather autocratic, unrelenting successful business man. His heart was wrapped up in the boy."

"Probably someone lost money in dealing with Franks, or felt injured in some other way. He nursed his resentment and decided to make him pay. That would have been the course of a paranoiac such as have described."

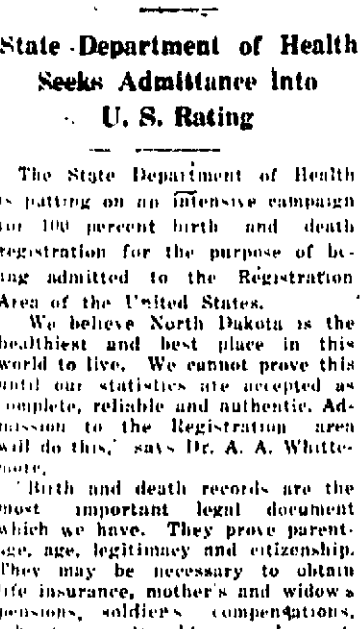

"I do not think it was mere bolshevik antagonism toward wealth. The person wanted money and at the same time wanted to hit the father where he would feel it."

"Murder was not intended. But the boy put up such a fight that great force was required to keep him quiet, and he died."

There is another possibility, according to Dr. Krohn, which would bring more than a single criminal into the case.

"When a woman is possessed with

Mr. Crowe declared the entire kidnapping and killing had been executed according to a carefully pre-arranged plan.

The boy was killed in the rented automobile on a heavily traveled street and within a few blocks of the spot where he was lured into the car. He resisted them and was struck on the head with the chisel and then gagged, Mr. Crowe said.

With the body on their hands, they had used acid in an attempt to disfigure it beyond recognition and then stripped it of clothing in the lonely spot where it was taken. Prosecutor Crowe asserted. Even either had been provided by the kidnapers as a precaution to overpower resistance.

While the boys were telling yesterday somewhat of but apparently frank stories of their movement on May 21 and of their past activities, the police were almost won to their side. The boys frankly said the circumstances looked bad against them.

For Sale—Choice Canarie Singers, Imported German Rollers, Jacob Bull, Dickinson, N. Dak., Box 728.

**BIDS FOR MILK**  
Contract to deliver milk. On June 10th the Bismarck Hospital wishes to consider and accept bids for milk to be delivered under contract for a period of one year. The milk must come from clean tested cows. Quantity from 40 to 45 gallons daily, delivery twice each day during warm weather. The Board reserves the right to reject any and all bids.

## LODGE TAKES STAND, STRIKES AT STATEMENT

Senator Declares He Knew Nothing of Liquor Permits, as Means Said

### DIS-TURBANCE RAISED

Washington, May 31. Senator Lodge, Republican of Massachusetts, took the floor today before the Daugherty committee today and made an explicit denial that he had ever permitted the issue of export liquor permits as indicated in recent testimony by Gaston H. Means.

The story told by Means was that a permit in which Senator Lodge interested himself, resulted in the export to Canada by Craven Brothers of a consignment of liquor which later was landed by smugglers off Atlantic City. The Senator declared, however, that he never knew of the existence of Craven Brothers.

The committee then heard another volunteer witness, A. J. Fink of Rochester, N. Y., associated in committee testimony with Foster Stinson, and he launched into a series of charges which created a disturbance that had to be quelled by the Senate police.

Fink shouted that he was "the man Frank Vanderlip tried to give \$1,000 for perjured testimony against President Coolidge and that he wanted to tell how Senator Wheeler, the committee prosecutor, got money for Foster Stinson."

Senator Ashurst promised to "put him out of the chairman will allow Fink to tell the truth before Senator Wheeler's committee. A moment later, the committee sent him out."

At the end of Means' cross-examination, Chairman Brookhart announced that the committee desired to hear former Attorney-General Daugherty next Friday.

Counsel for Mr. Daugherty agreed to communicate with their client and advise whether he could appear on that date.

## ASKS PARENTS AVOID ARRESTS

Chief of Police Warns Against Children Driving Cars

The police have launched a new initiative to obtain careful automobile driving.

Chief of Police Martineson today called general attention to the law prohibiting children under 16 years of age from driving automobiles, and urged parents to respect the law, to avoid arrests.

He also warned of the danger of bright headlights and called attention to the ordinance regarding dimmers on cars.

Five additional speeders were taken over the holiday, most of them on the concrete or prison road. No accidents were reported to the police.

## HEBRON MAN IS BURNED

Fred Braun Is Probably Fatally Injured

Mandan, N. D., May 31.—Fred Braun, a prominent miller and elevator man of Hebron, was probably fatally burned Memorial Day noon when he attempted to encourage fire in the range with kerosene. The car exploded and landed on his face. The kerosene caught his clothes. He ran to a creek with his clothes burning. His body was badly burned from the hips down.

He was taken to Dickinson to a hospital. The house was set on fire. His recovery is doubtful.

## CHARGES FOR WEIGHING CUT

St. Paul, Minn., May 31.—Livestock shippers of the northwest will be saved from \$10,000 to \$15,000 a year as a result of the reduction of weighing charges on cattle and calves in the South St. Paul yards, which will become effective June 1.

Frank W. Matson, railroad and warehouse commissioner in charge of state weighing activities announced yesterday.

The order for the reduction was issued by the commission yesterday following an investigation by Commissioner Matson of conditions at the stockyards and follows a plan to hold economy in that department.

The reduction is 100 percent, the price for weighing previously being 1 cent and now reduced to 1 cent per head. Weighing of hogs and sheep remains at the same price, namely 1 cent per head.

## FORECAST FOR NEXT WEEK

Washington, May 31.—Weather outlook for the week beginning Monday, June 2, of the Upper Mississippi Valley—Local showers at beginning and again near end of week, otherwise generally fair; temperature near or slightly below normal.

The world's total wool consumption is more than 500,000,000 pounds a year in excess of total production.

# What the World Is Doing

As Seen by Popular Mechanics Magazine

## Nine Million Persons Daily Ride in City's Elevators

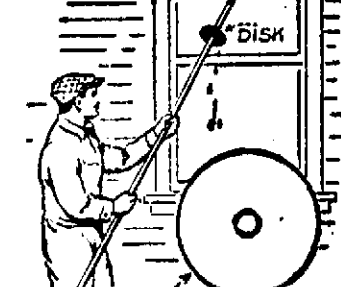

More than 9,000,000 passengers daily, it is estimated, are carried by the elevators in New York City. This number exceeds the number of riders on the street railways, subways, and electric lines, it is said. In many large buildings traffic rules and schedules are observed almost as scrupulously as those of large railroads, in order that adequate service may be rendered.

The story told by Means was that a permit in which Senator Lodge interested himself, resulted in the export to Canada by Craven Brothers of a consignment of liquor which later was landed by smugglers off Atlantic City. The Senator declared, however, that he never knew of the existence of Craven Brothers.

## Kink for Window Washers

When washing windows the surplus water has a tendency to run down the handle of the cleaner and into the sleeves or onto the clothing of the worker. This trouble may be eliminated by placing a small rubber disk on the handle, about a foot from the end, as shown in the illustration. The water will then run down only to the disk and drip off.

The disk should be about 4 in. in diameter and should be cut from soft rubber, such as a piece of inner tube.

4-DISK CUT FROM INNER TUBE

A hole slightly smaller than the thickness of the handle is cut in the center of the disk so that it will fit the handle snugly when slipped into place.

One-third of the silk used in the United States is said to be artificial.

## Ship Is Sent by Parcel Post for Use in Africa

Shiphubbing has been reduced to a science so precise that it is now possible to construct vessels in such a manner that they may be taken to pieces, the parts shipped, and finally reassembled into a seaworthy craft at the destination. Each part is numbered and ticketed, and full instructions accompany it, a vital necessity, as the engineer is often compelled to make use of native labor, which always must be under his eye if he is to secure satisfactory results. The steamship "William Mackinnon," the first to be launched on Lake Nyansa, Central Africa, reached Mombasa by parcel post from England. Then the parts were transported through 500 miles of jungle to the lake, on the heads of 5,000 Kafir porters. The boilers were dragged by oxen.

The story told by Means was that a permit in which Senator Lodge interested himself, resulted in the export to Canada by Craven Brothers of a consignment of liquor which later was landed by smugglers off Atlantic City. The Senator declared, however, that he never knew of the existence of Craven Brothers.

## Muffling the Alarm Clock

It is sometimes desirable to muffle the alarm clock so that it awakens the sleeper without disturbing those in adjacent rooms. A stout rubber band will be found very useful for this purpose. It is snapped around the clock and over the bell as shown, whether the bell is located on top or on the back, and muffles the sound most effectively.

RUBBER BAND

Telegraphic messages at the rate of 1,000 words a minute have been received on a moving, magnet-drum instrument on display at a recent exhibit of the British Imperial College of Science and Technology. The current, passing through coils, converts a rapidly revolving iron drum into a magnet for a brief space, attracting a siphon tube charged with ink. The dots and dashes are recorded on the paper tape as the drum flies past. It. Wireless apparatus that could receive 300 words a minute was also displayed.

## Sparrows Defy Gas "Attack" in War on Bird Pests

Resisting the fumes of mustard gas, and other deadly chemicals in quantities that would have proved fatal to a human being, English sparrows and domestic pigeons survived gas "attacks" in recent tests conducted by the government to find a way to rid the country of various bird pests. The subjects were placed in tight compartments, so arranged that the observers could watch their actions. The gas was administered in varying quantities. Amounts that would have killed a soldier caused the specimens to evince little agitation, and they recovered when taken into fresh air. In all, six varieties of gas were tried but without the desired effect. The experiments emphasized the difficulties encountered in ridding the country of the English sparrow in particular.

## ST. JOSEPH'S IN MANDAN TO BE CONSECRATED

Sermons Will be Delivered in Four Different Languages Next June 4

Consecration services of St. Joseph's church, Mandan, will take place June 4. The program opens at 6:30 a. m. June 4, with vesting of the clergy officiating at the consecration. At 7 a. m. will be a procession to the church. The consecration ceremonies will include relics and pontifical high mass. There will be sermons outdoors, dinner at noon, and an open air concert at 3 p. m. by Father Slag's St. Mary's band of Bismarck.

At the same time the church is being consecrated there will be four sermons in four different languages—in the English language in front of the church, in the German in front of the rectory, in the Bohemian at school corner, in Sioux Indian at the north-east corner.

Rev. Vincent Wehrle will be in charge of the consecration services, assisted by priests. Father Clement has been at the head of St. Joseph's church for 14 years.

As a part of consecration week, there will be a three days mission service, beginning Sunday, conducted by Franciscan Padres.

The most talkative character in all of Shakespeare's works is Hamlet, who has 1,569 lines to speak.

## High-Speed Telegraph Takes Thousand Words a Minute

Telegraphic messages at the rate of 1,000 words a minute have been received on a moving, magnet-drum instrument on display at a recent exhibit of the British Imperial College of Science and Technology. The current, passing through coils, converts a rapidly revolving iron drum into a magnet for a brief space, attracting a siphon tube charged with ink. The dots and dashes are recorded on the paper tape as the drum flies past. It. Wireless apparatus that could receive 300 words a minute was also displayed.

## Cleaning the Coffee Percolator

Coffee percolators occasionally become clogged and all efforts to open up the fine holes by scrubbing and washing are usually futile. A good method of doing the work is to hold the percolator in a gas flame for a few minutes and then tap it lightly; this will open all the holes at once. Obviously, this is much better than attempting to prick the holes open with a needle.

The report must be acted on by the senate.

As reported from conference the bill appropriates \$52,540, as proposed by the senate for enforcement of the packers and stockyards act, instead of \$226,770 as first written in by the house. The conferees agreed on a provision, replacing one inserted by the house and stricken out in the senate, stipulating that the secretary of agriculture may require reasonable bonds from registrants to secure the performance of their obligations, under the packers and stockyards act.

## Bismarck Physico-Electronic Laboratory

Lucas Block, Bismarck, N. D.

The late Dr. Albert Abrams advanced the theory that every disease has its particular vibrations, and if counter vibrations of the same intensity are set in motion they would destroy the disease.

Dr. Abrams machine was never patented, and for this reason duplicates and improvements on his electronic machine are on the market.

Dr. Enge, after careful study of the different machines has selected and installed the latest and most scientific Electronic Machine on the market.

## Social and Personal

### Bible School To Continue All Next Week

The enrollment of the Bismarck Vacation Bible School to date is 403, including teachers. Pupils are getting down to business in earnest as in former years, and a fine week is expected following Sunday. In order to do the best work in the school, it will be necessary for the children to be present each day, and it is the hope of the teachers that parents and friends will encourage prompt and regular attendance during the entire week.

The closing exercises will be held in the Auditorium Sunday afternoon, June 8. Certificates will be given to all who have completed the required work of the session. The teachers voted to arrange a picnic following the school when parents will be invited for an afternoon.

Pupils may enroll Monday and have the benefit of the week's instruction. All children regardless of church or creed are welcome and invited. The representation from the churches of the city is quite satisfactory. Supt. Johnson suggests that superintendents and teachers announce the school Sunday in their respective schools, stating that pupils may enter Monday if they have not already enrolled.

### BISMARCK LODGE NO. 936 ENTERTAINS

Bismarck Lodge No. 936, Brotherhood of Railroad Trainmen, entertained the members of Maudslayi Lodge No. 919, and Ladies Auxiliary at an informal meeting Friday evening, May 30. During the evening W. J. Godwin, chairman of the North Dakota Legislative Board, made a short address on State and National Political and Economic questions. The remainder of the evening was spent in dancing after which the Bismarck members of the Ladies Auxiliary served a luncheon at midnight.

### BACK FROM MEETING

Rev. C. F. Strutz has returned from the annual meeting of the board of trustees of Northwestern College, Naperville, Illinois, of which he is a member, and the Theological Seminary. He said he found crops late all along the line, and that at no place were they looking better than in North Dakota, except possibly in Illinois where the crops were somewhat farther advanced.

### RETURNS FROM EAST

Obert A. Olson has returned from a trip to Pittsburgh, Pa., and Wheeling, W. Va., on business. He also stopped at Rochester, Minnesota, to look after a farm of his mother. He said that the spring was about 30 days late with respect to crops throughout the middle west.

### ATTEND GRADUATION

E. J. Taylor has left for the east and will meet Mrs. Taylor in Washington, D. C. and proceed to Annapolis where they will attend the commencement exercises at the United States Academy from which their son, Edwin, Jr., graduates this year.

### RETURNING HOME

Mrs. N. L. Call will return tomorrow from Oakland, California, where she has been spending the winter with her son, H. L. Call. Mrs. Kaheine Call will come here from New York also to spend the summer.

### WILL GIVE PLAY

The girls of the 6th grade of the Indian School will give a play entitled "Mr. Different is Double-Crossed" on Saturday evening, May 31st at 7:30. All visitors are welcome to attend.

### LEAVE FOR MINNEAPOLIS

Mr. and Mrs. J. A. Doll, who have been visiting for the past two weeks at the home of their son, F. A. Doll, left this morning for their home in Minneapolis.

### COUNTY SCHOOL OFFICERS TO MEET

On Monday there will be a meeting of the county school officers to be held at the A. O. U. W. Hall.

### 8TH GRADE EXERCISES AT MCKENZIE

On Monday evening the eighth grade exercises will be held at McKenzie. C. L. Robertson will give the address.

### MOTORED TO CENTER

Miss Naomi Henderscheid who motored to Center to spend Memorial Day with her parents has returned to the city.

### RETURN FROM TRIP

Railroad Commissioners Fay Harding and C. W. McDonnell have returned from holding hearings at Hazen, Stevens, Antelope and Glen Ullin.

### MOTOR TO MINNESOTA

Dr. C. H. Schoregge and family motored to Henderson, Minn., last Wednesday to visit with relatives and friends.

### LEAVES ON VACATION

S. T. Parke of this city left to spend a three months vacation at Spearfish, S. Dak., fishing and camping.

### LEAVES FOR THE SUMMER

Mrs. J. A. Hyland of this city left this morning to spend the summer with relatives in Fargo and Arthur.

### RETURNS HOME

Miss Agnes Orr, who has been spending six weeks in Minneapolis, has returned to her home here.

### LEAVE FOR CHICAGO

Mr. and Mrs. G. McLaughlin left for Chicago to visit with relatives.

### Cook by Electricity. It is Cheaper.

### Child Prodigy On Piano Was Formerly Here

Jeanette Weinstein, daughter of William Weinstein of St. Paul, formerly of this city and proprietor of the Broadway Bazaar while here, is making a name for herself in the musical world. When she lived in this city, at the age of three years she started to take music lessons. She was a pupil of Mrs. D. T. Owens, pupil teacher under Mrs. Wheeler of Mandan. Mrs. Owens gave her the first year and a half of her piano lessons. After she had taken for three months she could play eighteen pieces. Mrs. Owens predicted that she would be world famous and it seems that she is going to fulfill that prediction. She is now studying at the Minneapolis School of Music Dramatic Art although only five years of age. Recently Jeanette was presented in a recital at the school in which she rendered numbers from such well known masters as Clementi, Grieg, Beethoven and Schumann.

### Poppy Drive Is Completed

The Annual Poppy Drive has completed a very successful campaign the proceeds for the entire week being \$416.57. The Captain for Thursday was Mrs. Phillip Elliot with Mrs. S. S. Boise assisting her.

The young ladies who assisted in the selling were: Marie Katz, Veronica Dodd, Phillip Fowler, Virginia Light and Abigail Roan.

About 475 of the big poppies were sold, the proceeds for Friday amounting to about \$20.

The Legion Auxiliary wishes to thank all the girls who so willingly gave their service to help in the sale. The Auxiliary also wishes to thank the public for their hearty cooperation and their generous response. They wish to thank especially the Grand Pacific, the Auxiliary headquarters, for their cooperation, the First Guaranty Bank for the use of the small banks which the girls used, and the Tribune and Farmer Labor State Record for publicity.

**TO VISIT IN CITY**  
Mrs. F. E. Norcross of Sheridan, Wyoming, arrived this morning to spend a few days with her brother and family. Mr. Fred C. Hanson, who will leave to spend some time with her mother at Pegasus Falls, on her return she will stay in this city before returning home.

### DRISCOLL HIGH HAVE EXERCISES

On Thursday evening the graduation exercises for the high school were held at Driscoll. There were four members in the class: C. L. Robertson, Deputy State Superintendent, gave the commencement address.

### GRADUATION EXERCISES AT REGAN

Miss Madge Runey will leave this evening for Regan to attend the eighth grade graduation to be held this evening. R. B. Murphy will give the commencement address.

### EXAMS BEING HELD IN COUNTY

The eighth grade examinations are being held throughout the county and reports are beginning to come in to the county superintendent's office.

### BRACELETS

Glass bracelets in delicate colors are a charming accessory for the frock of chiffon or printed crepe. They should be bought in half dozen lots, because they are worn that way.

### CHIFFONS

Printed chiffons add a certain weight and much charm by outlining the most noticeable patterns with small glass beads.

### UNUSUAL CAPE

A very unusual cape that is a part of the frock on one side and quite detached on the other makes this gown of almond-green silk with satin overplaid distinctive. The wide flat band of braiding running from shoulder to hem line is most effective on figured material. The cuff almost covering the hand is a fashionable touch.

### They're Candidates For Presidency Of Federated Women's Clubs

MRS. WALLACE T. PERHAM

These three women are prominent candidates for the presidency of the General Federation of Women's Clubs, which holds its biennial convention in Los Angeles June 2 to 13.

They are: Mrs. Wallace T. Perham, Glendive, Mont., second vice president of the Federation and vice chairman of the defense, and four-minute speaker during war.

Mrs. John D. Sherman, Ester Park, Colo., chairman of the Department of Applied Education and club organizer.

Mrs. William S. Jennings, Jacksonville, Fla., first vice president of the Federation and vice chairman of the Woman's National Southeastern States.

### CITY NEWS

**Birth**  
A baby girl was born to Mr. and Mrs. Ludwig Loran of Willa.

### Starts House

O. A. Olson is having the foundation laid for a colonial residence on West Thayer street, on a lot between the houses of Frayne Baker and Judge Miller.

### Getting Along Nicely

Dr. V. J. LaRocca, who returned last night from Minneapolis, said that Dr. C. O. Robinson, in a hospital there recovering from injuries, is resting quite well, is getting along as well as can be expected.

### Bismarck Hospital

Admitted to the Bismarck hospital for treatment: Theo. Reister, Medina; Veil Moore, Forbes; Mike Wedrick, Beulah; Virginia Brown, McClusky, Discharged; Miss Clara Planert, Enbridge, Wis.; Master Reuben Witzel, Danzow, Mont.; Christ Boehler, Hebron; Thos. Kleppe, Kintyre; Mrs. John Hill, Rose Glen; Emma Miller, Wishek; Mrs. C. W. Nelson, city; Mrs. Nick Orel, McIntosh, S. Dak.; Rev. R. Tamm, city; Lillian Enssler, Wishek.

### Under Arrest

George Miller, living on the south side, was arrested by police on a charge of stealing three chickens belonging to George Roden, a neighbor. States Attorney Allen said the theft was admitted. The sheriff and police, after complaint had been made and a search warrant issued, went to Miller's house and found chicken boiling in a pot. The authorities said Miller denied the complaint and was later admitted.

### St. Alexis Hospital

Admitted to the St. Alexis hospital for treatment: Paul E. LaFrance, City; Leo Landwehr, Elbow; Ma. Jean, J. Galvin, City; Mrs. A. Jacobson, Glendive, Mont.; Mrs. E. M. Graf, Linton; Mrs. Anton Wald, Strasburg; Mr. W. W. Sandy, City; Mr. J. P. Lange, Shields; Miss Odilia Laumger, Strasburg; Miss Emelia Sailer, Hazen; Mrs. Mich. Hilscher, Bismarck; Mrs. M. J. Wildes, City; Discharged: Mr. H. E. Shearn, City; Mr. John von Holtum, Lismore, Minn.; Mrs. John Kruckenberg, Stanton; Mrs. P. D. Pfaff, Almont; Mrs. W. T. Kraft and baby boy, City; Mrs. R. G. Schneider and baby girl, City; Master Herbert O'Hare, City; Miss Katherine Schwarzenberger, Beulah; Miss Veronica Schwarzenberger, Beulah; Mrs. R. J. Fitzgerald and baby boy, City; Mrs. Frank Berger and baby boy, Glen Ullin; Mrs. Chas. Kyt, New Leipzig.

### TRANSFERS MADE

Special orders issued from the headquarters of the 88th Division U. S. A., Minneapolis deal with the transfer and assignments of reserve officers. Those in western North Dakota affected by the order are: from the Service company, Kenneth B. Burns, Garrison; from headquarters, 3rd battalion, Major Hugh McCullough, Washburn and Capt. Gordon J. Oppenard, Beach; from Company I, Lieutenants Charles M. Chafe, Flasher; Lester S. Diehl, Bowman; Ralph M. Williams, Mandan; from Company L, Horace E. Darling, Berthold; Gustaf A. Lindell; from company M, First Lieutenant Harry A. Jones, Bismarck.

### SPORT COATS

Short sport coats of quilted satin or crepe de chine are very odd and attractive too with the white flannel skirt and the sport hat.

### PARIS LATEST

Matching hats and ears of kasha cloth in yellow, henna, emerald or white are being worn in Paris.

### VELVET POPPIES

Black velvet poppies on a large black straw hat lined with white make a picture out of any woman.

### FLANNELS

Flannel coats and suits for summer are marked at very reasonable figures and are copiously trimmed with rabbit fur.

MRS. JOHN D. SHERMAN

MRS. WILLIAM S. JENNINGS

### AT THE MOVIES

#### AT THE CAPITOL

"A Woman of Paris," the first Charles Chaplin serious production for United Artists Corporation, will be the attraction at the Capitol theatre, starting next Monday for an indefinite engagement.

This important announcement is made by the Capitol, who at great cost prepared for presentation this remarkable photoplay; the first dramatic contribution produced by the great genius of the screen—Charles Chaplin.

#### THE ELTINGE

"Pola Negri's life has been a series of experiences more dramatic than those of any drama which she could ever play," says Photoplay Magazine. "Hence, the truth of her portrayals. She has known triumph before the age of twenty as an actress, she has been hailed in America as one of the greatest artists of a century."

"And always she has been courted by men."

#### GRAY PEARLS

A necklace of gray pearls is never than one of black and is much more fascinating.

#### Interesting Sleeve

The scarf sleeve is the interesting feature of this frock and is one that could easily be copied. It consists merely of a length of crepe applied to the under portion of a very short sleeve. The collar on this imported frock fastens in the back and a double girdle keeps the lines very trim about the hips.

### Words That Struck Home

By ELLA SAUNDERS

Kathleen looked around the little shabby hall bedroom that she was soon to leave forever. Her suitcase was packed, and it contained all her worldly possessions. The only other thing she had of value was her face—her beauty.

She surveyed herself in the glass. "For Sale," she thought bitterly. "Well, why not? After those three years of struggle and poverty in the city—why not, when Ellis loved her?"

Mechanically she picked up a letter lying on the table. She must not leave it there. She was growing careless. She read it once again:

"I'll call for you at nine tonight and we'll be on our way West by midnight."

Ellis loved her. He was employed in the same office with her. He was manager of a department. He had had an offer of a better post in California. He had five thousand dollars a year in his present position, and he had money saved. Yes, it was a good thing for her.

And he had sworn to marry her after his wife divorced him.

Kathleen's last scruples had been broken down. She was eagerly waiting for him. Soon she would hear his footsteps on the stairs. He would catch her in his arms. And she would be safe with him at last. Safe forever. Safe from the daily sordid grind, the poverty.

A tap at the door. Surely it could not be Ellis! Kathleen went to it with a wildly beating heart, and opened it. But it was only old Mrs. Toms, the landlady.

"I beg your pardon, Miss Jameson, but about that week's rent in advance," she began. "You leaving so sudden—"

"Oh, yes, Mrs. Toms," said Kathleen, taking up her purse.

She paid the landlady. "I wouldn't ask for it, God knows, Miss Jameson, if things wasn't so hard," said Mrs. Toms. "But you know how it is."

"I suppose things are pretty hard in your business," answered Kathleen mechanically. She wished the woman would go.

"Say, hard ain't the word, Miss Jameson! And what with four children to bring up, and my husband God knows where! It's awful. I'm tempted just to get off some where and get a job and leave them all."

"But of course you wouldn't do that."

"Well, I guess not. But—you'll understand, Miss Jameson, there was a time just after little Charlie was born—I was younger-looking then than I am now, and considered pretty. And there was a gentleman—"

Mrs. Toms put a corner of her apron to her eyes and began to cry. "Frank and never got along together, not from the beginning. He used to ill-treat me. And Mr. Farrington, he came along and wanted me to go South with him. Heaps of money he had, too. If only I'd gone. But there was little Charlie, and somehow I couldn't."

Kathleen was speaking with suppressed eagerness.

"Why—I guess I'm glad on the whole, Miss Jameson," answered Mrs. Toms. "I like sometimes to think of it, when I'm feeling low, and to picture what might have been. But I guess there wouldn't have been no real happiness in it. You can't get happiness that way. It's all a sort of game, this living, and one's got to play it. And I've played it."

Her words struck home in a way she did not imagine. She turned toward the door.

"Well, I'm sure I'm thankful to you for that money, Miss Jameson," she said. "And of course you understand how it is."

"Oh, quite, quite," answered Kathleen.

She was standing in the middle of the floor, her hands clenched. In that moment she was making the decision of her life. A game! To play or not to play?

Suddenly, impulsively, she called to the woman:

"Oh, Mrs. Toms?"

"Miss Jameson?"

"If my friend calls for me this evening, tell him I'm gone and that I'll write to him."

But she knew that she would never write.

### Kiddies' Evening Story

By MARY GRAHAM BONNER

#### A Coyote Mate

It was all very well for people to talk of happiness, but they did not know so much about it as Mother Coyote.

In the first place, there was her mate. He was so devoted. He stood guard outside the den—far enough from it so that he could mislead those who wanted to find out where it was.

He could get food for his family, and he was so unselfish. No matter how tired he was he was always ready to help Mother Coyote and the babies.

Even when he had hurt himself at one time, he did not think about that, but only of how he could keep the little ones safe, and so keep Mother Coyote from worrying and fretting herself and making her dear little coyote set on fire, as she would have done had harm befallen them.

Once they had had to move. It was all very well to love the old home den. They did not want to move.

They hated leaving the dear, familiar sights which they had grown to love.

They, too, loved their home. They did not want another.

They were not restless, not anxious to move. It was a nuisance—

Mother Coyote Had No Complaint.

especially when they had been so contented in the old home.

They were not anxious for change of view or anything of that sort. They did not want a bigger place—they did not dream of a great palace home.

But they had had to move, as their home had been discovered—discovered by enemies—and they knew they would no longer be safe.

That was why they had moved. But it had not made Mr. Coyote cranky—even though he had had a slight accident in saving one of the children who had fallen in a stream where there was a rapid current.

He had hurt himself and tired himself all out in saving the child. There were four others, but the fifth was just as important and dear as any of them.

And it hadn't mattered how Mr. Coyote had felt himself. He had seen the look in Mother Coyote's eyes as she had scrambled after the others to keep anything like that from happening to them.

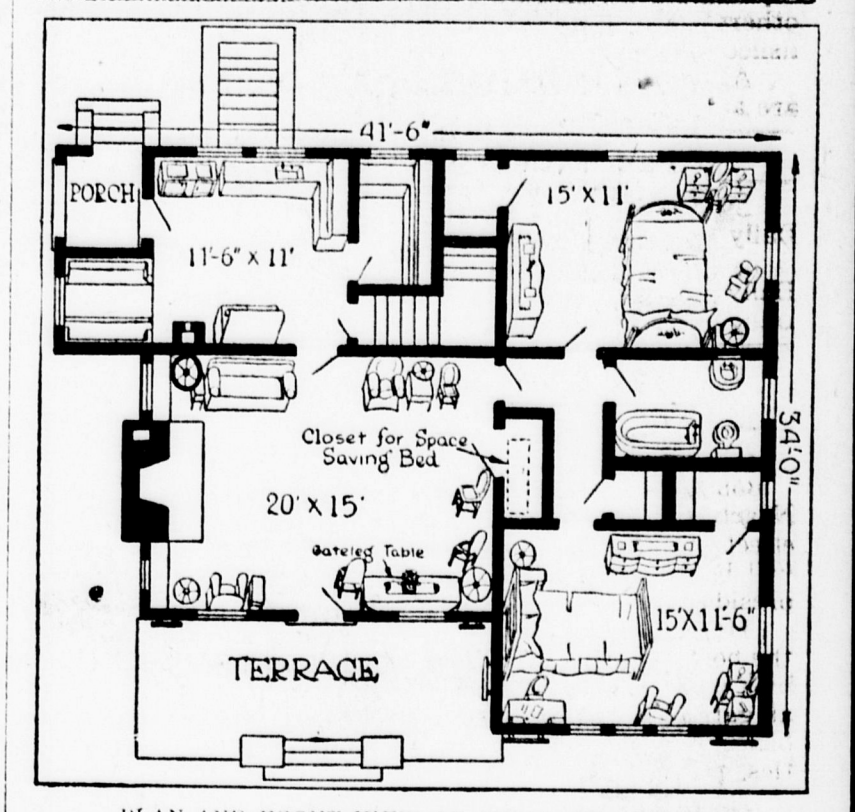

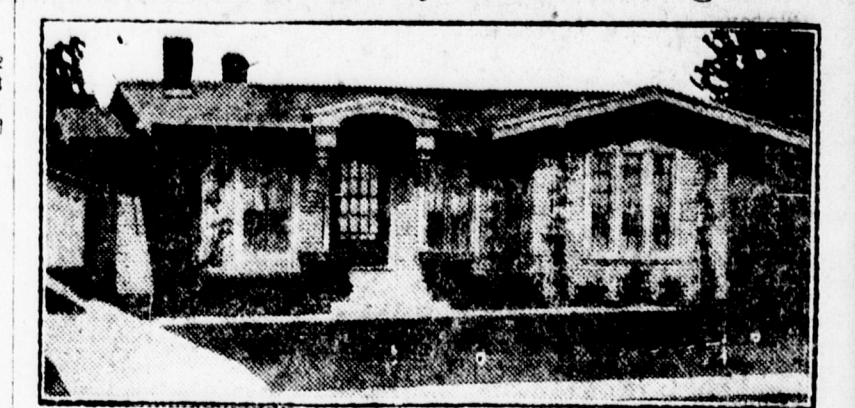

Yes, he had seen that look in her eyes, and he had said to her with his eyes—for he needed all his strength to save the little one—"I will save him for you, little Mother Coyote."

And he had.

Oh, yes, others could talk of happiness. Others could talk of riches.

Others could talk of travels

### Home for Small Family Has No Dining Room

PLAN AND FRONT VIEW OF SMALL BUNGALOW

The small family, with few extra requirements, will find this four-room bungalow, convenient, comfortable and homey.

Its feature is the combination living and dining room, with a closet for a space-saving bed, for emergency. A gate-lane table, at the side most of the day, may be taken into the middle of the room and set up for dining.

For the small family alone, the requirements of the kitchen is convenient and will do for most dining purposes.

No vestibule is built, saving the space required for this to make a roomier living and dining room. A home like this should cost about \$5000, dependent on the locality and its proximity to the sources of supply.

### NOTICE TO VOTERS

Requests having been made of me by several mothers to enter my name at the school election June 3, I have filed for this position and ask the support of the voters of Bismarck.

Beatrice Mann.

### THE DEPOSITOR NOT THE DEPOSIT

This bank is more interested in the development of the depositor than the size of the deposit.

This attitude is adopted not so much from the spirit of altruism as from the realization that the bank prospers as its depositors prosper. For this reason, our facilities and service are planned with the idea of giving maximum service to our customers as their needs require.

Establishing a connection with this bank carries with it the service and co-operation of an institution which has developed its facilities for carrying on a commercial banking business through nearly half a century.

## HEILMANN IS BACK IN LEAD IN AMERICANS

Detroit Slugger Makes Up For Lost Time During the Past Week

WILLIAMS TUMBLES

Chicago, May 31. (By the A. P.)—Harry Heilmann, of the Tigers has returned to the batting leadership of the American League with a mark of .435, five points under his average a week ago, which then put him second according to averages released today, which include games of Wednesday.

Kenneth Williams, St. Louis slugger who at the last compilation was chief swatter with an average of .447, tumbled violently to .395 and stands number two. Ike Boone, former Southern League now with the Red Sox, hit his way into third position with .385.

"Babe" Ruth, has about found his stride with an average of .336. In making his march toward the top the home run king crashed out two circuit drives and ran his string to eleven.

Heilmann increased his lead in total bases to 97, while Joe Harris of Boston, ran his total of runs scored to 34.

Eddie Collins stepped just one base faster than his teammate Bill Heston, which put him in the front with nine.

George Sisler slid further down the column, his average being .294 compared with .333 a week ago.

Other leading batters: J. Harris, Boston, .376; Meusel, New York, .372; Jameson, Cleveland, .367; Cobb, Detroit, .347; Dugan, New York, .347; Ruth, New York, .336; Judge, Washington, .333; Sheely, Chicago, .330; Jacobson, St. Louis, .330.

**Flack Goes Good**  
Max Flack of the Cardinals, and Jimmy Tierney of the Braves, in the National League, each boosted his mark until now they are keeping company with the leaders, who are being shown the way by Rogers Hornsby, who is comfortably in first place with .421. George Kelly of the Giants, runner-up with .387, displaced Zack Wheat of the Dodgers, who dropped to third with an average of .380. Flack and Tierney are tied with .328.

Hornsby pushed his total base record to 93. Frank Frisch of the Giants swelled his total to 35. Jacques Fournier of the Dodgers, garnered another homer and leads with 25. George Grantham of the Cubs, stole another base and broke the triple tie of a week ago. He has ten.

Other leader batters: Snyder, New York, .360; Fournier, Brooklyn, .356; Frisch, New York, .342; Grantham, Chicago, .329; Flack, St. Louis, .328; Tierney, Boston, .328; Grimes, Chicago, .326; Young, New York, .325; Grinn, Pittsburgh, .322.

Neun of St. Paul, who challenged Bunny Brief of Kansas City for the leadership among the batters of the American Association, has dethroned the King's slugger, who failed to keep up his hitting, while Neun smashed out 11 hits in his last seven games, acquiring an average of .438 compared with .414 a week ago. Brief dropped to .410, a loss of 24 points. Allen of Indianapolis trailed with .393.

Reb Russell of Columbus and Walker of Minneapolis are tied for home run honors with six each.

In addition to jumping out in front among the batters, Neun, also is showing his heels to the base stealers with 29 thefts, a mark which is better than in practically every league.

Other leading batters: Betzel, Louisville, .390; M. Shannon, Louisville, .382; Covington, Louisville, .382; Bressen, St. Paul, .377; Lamar, Toledo, .371; Maguire, Toledo, .367; E. Scott, Kansas City, .359; Grimes, Columbus, .355; Brown, Indianapolis, .346.

**GROVE DEFEATS COLLEGE NINE HERE, 15 TO 8**

In a loosely played contest on the prison field the Prison team defeated Jamestown College yesterday by a score to 15 to 8. R. E. Smith, leaving for the prisoners, had everything his own way until the sixth, when Jintown tallied three times. Smith tore loose a home run in his shoulder in this inning and was replaced in the seventh by McCall. The boys from Jintown landed heavily on McCall's offerings and Scott replaced him in the ninth. Grove ran wild in the second when they gathered seven hits, two of which went over the wall. Scott and Fletcher Smith both pounded out home-runs in the second. Riley, star third-sacker for the winners, handled a fast one in the fifth, and coupled with a pretty throw to first, retired the side. Raugust, third baseman for the visitors, fielded a hot one of Scott's in the seventh. Smith injured his arm in the sixth and allowed the Collegians to count three runs. It is not likely that he will be able to work again for some time. Lefty Scott went in in the ninth, when the bases were loaded, retiring the side with a pretty double and a strike-out, and allowing but one run. The Prison outfit was never headed and it looked like an easy win from the start, although the plucky Jintown outfit staged a rally in the sixth, which looked bad for the locals. The next game at Grove will be

## But He Must Remember Not to Write Stories

SANDY WEINER

Bill Tilden, who stumped his toe on a folding typewriter and thereby lost his amateur standing in tennis, is rooming Sandy Weiner, 16-year-old Philadelphia boy, as his successor.

Weiner has developed a typical Tilden style on the courts and seems to possess much of the champion's great ability.

Some day he may be the nation's champion but he must remember not to write pieces for the papers or the magazines, for that would make him a notorious professional, as the lawn tennis officials see the matter.

Sunday, June 1, when the fast Brad-Devi team comes here.

Jamestown College . . . 8 11 5  
Grove . . . 15 8 0

Batteries: Jintown, Bristol, O. Hewitt and McClellan. Grove: Smith, McCall, Scott and Snyder.

**MATERIAL FOR STATE 'U' GRID TEAM IS GOOD**

Spring Practice Indicates Nucleus of Strong Eleven Next Fall

Grand Forks, N. Dak., May 31.—A 6-6 tie game ended the spring football training period at the University of North Dakota recently and brought to light much new material for the 1924 gridiron campaign.

Aided by the cool weather Coach Davis kept his charges in maulskins for two months, the longest and most extensive training period the Flickertails have ever received in the spring. Work on fundamentals was stressed and university fans will see a Green and Pink eleven next autumn that will know football from A to Z.

Backfield prospects for the coming season are not overly bright. Outstanding among the new ball carriers is Dunham, halfback, who hails from Fargo. This back picks his holes in nice fashion and crashes the line with plenty of drive. Davis will count heavily on Dunham next fall.

John Frederickson of Cooperstown who made his letter last fall also put up a brilliant exhibition in the open field. His footwork in the open field will make him a valuable halfback in the coming campaign. Ted Arndt of Aberdeen has shown much promise as fullback this spring. He is heavy and drives hard. He will make a strong bid for a regular berth next September. Les McDonald of Mandan, a halfback, has a nice change of pace in the open field, and can reverse his field in better fashion than other North Dakota backs.

Stepping of Stephen, Minn., who made his letter last fall, is another halfback possibility. Joe Drew of Devils Lake, who was not out for spring football, and Fred Thacker of Hamilton, fullback last year, are men who promise much for next season. Thacker especially should have a big year.

Grant Nelson of Grafton was not out for spring training, leaving the quarterback jobs for Don Nemic of Minneapolis and Harold Goldberg of Minot. Goldberg, although light is the ball exceptionally well and is a good defensive man but his generalship is of an unknown quantity. Other backs who were out this spring are: Sprout of Buffalo; King of Williston; Veigle of Dickinson and Mulhair, Valley City.

North Dakota promises to have a powerful line for the coming season. Davis has an abundance of big experienced forwards, and this collection of huskies should test such teams as Minnesota and Wisconsin to the utmost.

Captain Nig Currie of Cando will be used at either tackle or end. Currie, all-Conference tackle, is one of the best linemen in the West. Myers, Gronvold, Doe, Ridgeway, MacNamara are all ends of ability. Myers of McCluskey is big and strong and appears to be a comer. Gronvold put up a clever exhibition of defensive and play in the spring game and will see service next year. Ridgeway, regular end in 1923 was not out for spring practice.

**FOUR N. D. BOYS ARE QUALIFIED**

Four North Dakota boys have qualified in the preliminaries of 4 events run off at the national high school and academy meet which is being held at the University of Chicago according to Associated Press dispatches last evening. They are: Ted Fuller of Fargo, Johnson of Pembina, James McCracken of

Yankees, with Meusel, Pipp and Ward coming up.

A little later in the game he was up against the same situation and once more he kept the Yanks from scoring.

On another occasion, with runners on second and third and one out, the champs looked dangerous. Nothing doing as far as scoring. Wingard stopped 'em.

Wingard won his game 2 to 1, a most unusual contest, since the three runs of the game were made on circuit drives. Ruth scored the Yankees' only tally by hitting one into the right field stand.

If Wingard's performance against the Yankees is a true test of his mental and physical courage, Manager George Sisler has picked up one of the finds of the year.

Milwaukee 9; Kansas City 8 (first game, 10 innings).  
Milwaukee 3; Kansas City 0 (seven innings).

**LINTON TEAM TO PLAY HERE**

The fast Linton independent baseball team will meet the newly organized Bismarck Independents here Sunday afternoon at 3 p. m. in a baseball game. The Bismarck lineup will be: Fuller, 2nd; De-Rochford, ss; Thompson, 3b; Byerly, 1b; Bauer, rf; Christy, cf; Dohn, lf; Sorlien, p.

George Smith, manager, hopes a good crowd will be out to encourage the efforts to promote independent baseball here.

**PANCHO VILLA KEEPS TITLE**

New York, May 31.—Pancho Villa, sensational Filipino flyweight and holder of the world's 112 pound crown successfully defended his title by decisively outpointing Francis Ash of England in a 15 round match at the Nostrand A. C. in Brooklyn last night. The champion carried a relentless attack to his challenger throughout and won every round easily. Villa weighed the flyweight limit of 112 while Ash scaled 110½.

**USING THE RIGHT CLUB IMPORTANT**

Knowing How to Play the Shot Is Only One Phase of Golf Success

By Joe Williams

It is one thing to know how to play a golf shot. It is another to know what club to play it with. This may not be as silly as it sounds. The one is a matter of mechanics, the other of judgment.

And in matter of judgment the golfing mind is not always error-proof.

Whether a shot should be played with mashie niblick or mashie, brassie or full iron frequently forms a problem requiring more than momentary thought.

The stronger club may send you too far, the lighter club may leave you far short.

And the element of doubt thus created is almost fatal to the job with your concentration, with the result that a bad shot is inescapable.

We saw a splendid example of what unerring selection of clubs will do for an ordinary player's game at Inverness several years ago.

J. K. Wadley, a lumberman from the southwest, played a sociable round with Jim Barnes, the noted professional, the day before the open championship started.

Wadley is an 85 player or thereabouts. This day he was hitting his shots fairly well, and undoubtedly would have scored decently even without Barnes' help. But he had Barnes' help and he had it at times when perfect judgment was needed most.

This was in the selection of clubs on second and third shots to the green. Whenever there was any

doubt Barnes made the decision and his decisions, naturally, were always pretty good.

Well, the result was Wadley gave the stiff Inverness pair a terrific battle. Instead of his customary 85, Wadley was closer to 75, due partly to some excellent shots of his own, but mainly to Barnes' expert advice.

This incident does not exactly point a moral but it at least shows that hitting the ball perfectly is only one part of the game.

## FAST TIME OF SMALL MOTORS RACE FEATURE

Automotive Engineers Praise 122-Cubic Inch Displacement "Babys" on Speedway

2 DRIVERS SHARE WIN

Indianapolis, May 31.—The annual 500 mile race at the Indianapolis motor speedway yesterday produced record breaking time for the great gasoline classic and also brought honors to two race drivers—Joe Boyer, of Detroit, and L. L. Corum, of Indianapolis. To Boyer goes the credit for bringing the winning car across the finish line, while Corum, who was in the drivers seat of the victorious car as it flashed away at the start, will go the rich cash prizes of approximately \$30,000.

**Boyer's Car in Trouble**  
Boyer, who retired when his own car developed trouble, piloted the winning machine over the last 233 miles, but W. D. Edens, representative of the contest board of the American Automobile Association, declared that under the rules Corum would be credited with victory and therefore is entitled to the prize money. Boyer and Corum, were team mates driving Indianapolis made cars.

Setting a terrific pace in the winning machine, Boyer moved up from fourth place and after a speed duel took the lead from Earl Cooper at 445 miles and held it until the finish. Cooper finished second, 1:24 seconds behind the leader and Jimmy Murphy, winner in 1922, eased into third place nearly three minutes later.

**Averages 98.24 Miles Per Hour**  
The average of 98.24 miles an hour maintained yesterday cracked the race record of 98.48 miles per hour established by Murphy when he won in 1922. The elapsed time for the entire route was five hours, five minutes, 23 51-100 seconds, this breaking Murphy's record of 5:17:30.79.

The first five finishers all eclipsed the track record, thus showing the hot pace maintained. Automotive engineers declared it a victory for the 122 cubic inch piston type of racing motors, in their second year of competition.

Others who shared in the \$50,000

divided among the first ten to complete the race finished as follows:

Harry Hartz, fourth; Bennie Hill, fifth; Pete De Paolo, sixth; Fred Comer, seventh; Ira Vail, eighth; Antoine Mourre, ninth, and Robert McDonough, tenth.

A consolation prize of \$10,000 was distributed among the other 12 drivers who started.

**Corum Gets \$25,000**  
Corum, as a result of the victory will receive \$20,000 for first place, approximately \$8,000 offered by accessory firms and numerous cups and trophies. He did not win any of the lap money, this going to Cooper, Murphy and Boyer. Boyer got into the lap money by shoving

his own car over the tape first in the initial lap. Cooper's lap prizes were announced as totalling \$3,400 and Murphy's \$2,800.

**RACER KILLED**  
Norfolk, Va., May 31.—Paul T. Marsha, 28, of Norfolk, was fatally injured yesterday in an automobile race at the Dixie track here. His car skidded, went through the fence,

turned over and landed with the seat on the driver's neck. Marsha was pronounced dead when rushed to a hospital.

A special light ray which will penetrate 300 yards under water at any depth has been invented by an Italian.

# Knowledge That Pays

You gain a degree of satisfaction just in knowing things—what Einstein believes, how radium burns, which kings are still holding thrones. Yet such knowledge gives you little more than just that satisfaction.

By reading advertisements, you gain knowledge that pays . . . that pays you definitely in time, money, comfort and convenience.

Each day in these pages, advertisers tell you of products devised to make you happier. They seek to arouse you to improvements that will enrich your home, lessen your work.

By reading the advertisements, you can know where to secure the best and most serviceable for you. You can avoid inferior goods and uncertain shopping. You can save.

Read the advertisements. You owe it to the advertisers who are trying to serve you—and to yourself.

THE STATE'S OLDEST NEWSPAPER  
(Established 1873)

**BOBBED HAIR**  
Bobbed hair is having a secondary period of popularity. Nearly half the well-dressed women either bob their hair or effect a substitute. In two more months three-fourths of them will be in the bobbed ranks. So reports J. Schaeffer, vice president of the National Permanent Wave Association. He says the general opinion among hairdressers is that the bobbed hair rage will last about one more year. It might be a good idea for political leaders not to mention this news at gatherings of women voters. On the same principle that baseball or bootlegging can shift men's attention from politics, pronto.

**ESCAPED**  
A lot of talk about this tax plan and that, about the big and little taxpayers and which is in most need of relief. In the discussion, every one seems to have forgotten the great majority who pay no income tax at all. There are 102 million people in America who escape the income tax, and at least 47 millions are adults. Any changes in income taxes will eventually affect all of these people who do not pay. Taxation of any sort is a brake on general prosperity, also a powerful influence in shaping the distribution of wealth.

**QUART**  
Manhattan Island, heart of New York City, was bought from the Indians for a quart of whisky. A few thirsty people may figure that the Indians got the better of the bargain. But Manhattan Island paid over 66 million dollars national income taxes in the quarterly payment period that ended March 15. Three more payment dates this year. That is a tax on earnings. The value of Manhattan property runs into the billions. Contrast with the original quart of whisky, and you realize the tremendous changes wrought by time in America. Land now purchasable "for a song" may eventually be the price of a city larger than New York is now.

**PSYCHOLOGY**  
The best of weapons are not much good to an army with low morale. It's the spirit of determination and fearlessness among the soldiers that wins most battles. So with business—prosperity or hard times. Both of these conditions depend mainly on the mass psychology of the public. People create what they fear. If they fear depression, they are sure to get it, for their fear makes them stop spending—thus shutting down factories and stagnating distribution of commodities. "Panic" is a good name for a business depression.

**SPEED**  
Delicate machinery reveals that radio impulses traveled from New Jersey to Poland at a speed of about 150,000 miles in a second. Such speed is beyond human imagination. And yet it is slow compared with the fastest thing in the universe—human thought, which can travel from your brain to the farthest star in the twinkling of an eye. A bit slower is the speed when an old man's brain flashes back to his boyhood.

**FOUR-FLUSHERS**  
Most crimes are staged at night; evil loves darkness. Where there's secrecy, something's usually being hidden. The purpose, in opening income tax returns to public inspection, would be mainly to expose people and corporations with large incomes who manage to conceal part of their earnings and get off with low taxes. More entertaining to the public would be the exposure of four-flushers who make less than they claim. Many a \$10,000-a-year front masks a \$3000-a-year income.

**GAIN**  
America's foreign trade is considerably bigger than a year ago. In the 10 months ended May 1, merchandise exports exceeded imports by nearly 700 million dollars. Fine—provided we ever get paid the difference. Half of this excess was shipped to us in the form of gold. How about the other half? Was it paid for in securities or just charged on the books? A nation, like a storekeeper, can sell unlimited amounts of goods if it isn't particular about date of payment or certainty.

**BACKWARD**  
Schools for feeble minded and sub-normal children are steadily increasing their activities. In 1900 there were only 29 such schools in America, with 10,217 pupils. Now there are at least 220 schools with over 65,000 pupils. Backward children in former generations were given up as hopeless, often even ridiculed. Now we know that in many cases they require only special training to bring them to normal or in the immediate neighborhood. Yes, we're learning—though slowly—about that most mysterious thing in creation, the human brain.

**PENALTY**  
Convicted of stealing \$23 and a watch from a sailor named Kama, a man in Brooklyn, N. Y., is sentenced to 25 years in the penitentiary. War profiteers, reading this, will realize how fortunate they are. The fellow who robbed the sailor was handed about a year for every dollar of loot. If the same system were applied to the war-profiteering looters, a dollar a year, some of them would be in jail. Boy, fetch an adding machine.

Vacation days are coming. Better start resting up for them. A vacation would be a bad vacation.

Mayor of a Texas town got fired. If you need some slightly-used oaths he may sell cheap.

## Editorial Review

## PROSPERITY BY LEGISLATION

Bonus bill, farm aid bills, tariff bills—legislation designed to benefit this or that class, what does it all come to? The old delusion regarding the function and the powers of government still continues. People persist in believing that laws can make them prosperous. They imagine that governments can redistribute existing wealth, taking it away from the rich and giving it to the poor without lessening its total amount. They forget that although a government may destroy wealth, it cannot create wealth.

Does the passing of the bonus bill make the people of the United States any richer? Would the enactment of the McNary-Haugen bill make a single bushel of wheat actually more valuable to the world than it is today? There is a grim retribution about all these efforts to divert the normal currents of economic law. The men who received a bonus payment may lose his job because industry is crippled by the tax burden; the farmer who enjoyed a high guaranteed price for wheat in 1919 saw the value of wheat relatively sink far below that of other staple commodities in 1921.

Laws will not make people richer, any more than they can make people good. To some extent they can protect and prevent; they cannot create. They can make special provision for the unfortunate, but they cannot do more than give the normal citizenship a fair chance to take care of itself. Russia tried to confiscate wealth and the poor starved to death; the attempt to redistribute property by law resulted simply in the destruction of the very foundation of life.

Congress has been a prey to the terrors that inevitably grow out of this belief. People naturally want to be prosperous, and if they think laws can make them so, they will insist that such laws must be passed. Presumably most of the members of Congress know better; they have seen all the old, tawdry tricks exposed, and they are sadly aware of the utter futility of the legislation for which they so fervently plead. But they argue, they represent the people, and the people want laws to make them rich. What can Congressmen do?

Nothing, unless they have the courage to tell the truth, unpleasant as it is; to say to their constituents that their prosperity is an economic, not a legislative matter, to be measured solely by the quantity and quality of the work they do, and the world's demand for that work. Until that fact is understood, economic legislation will be a series of shattered hopes; for the man whose sickness is in his pocketbook, the law is at best a quack doctor, promising much but totally unable to effect a cure. —Minneapolis Journal.

## OPEN THE SEAWAY

In the year 1923 that great American enterprise, the Panama canal, passed more tonnage than any other canal. The Panama tonnage for that year was 24,737,000 tons. The Suez canal handled 22,720,000 tons. This was the first year in which the Panama canal assumed world leadership. It is of interest to note that the tonnage handled at the Duluth-Superior harbor is far in excess of the great tonnage through the Panama. In 1922 it was 32,292,074 tons. The Panama canal route has been of great advantage to American trade with all the nations of the Pacific. It is not too much to say that it tends to make this country the central trading nation of the world. It ships by short sea routes East and West with easy facility. In 1923 American trade with fifteen Pacific powers was worth \$1,532,000,000 as against \$169,000,000 in 1913, an increase of 233 per cent, while the increase of our trade on the side of Europe during that period was but 70 per cent. This great gain on the Pacific was due to the lessened sailing distance between our ports and the Panama canal and the countries of the Pacific on the American as well as on the Asiatic coasts.

Similar results would follow if the Duluth-St. Lawrence deep waterway were provided, so that the trade of the interior of North America, now hampered by numerous obstructions and by blind greed, were freed. The benefits flowing from a great seaway in the St. Lawrence, so large that great ocean freighters could pass, would go to the people in general. Such an exit would add to the value of salable product of interior North America. Its effect would be like striking chains from a slave. Interior cities would feel the stimulus and every farmer who raises crops west of the Thousand Islands would know forthwith that he was living in a better land.

It is time for the people on both sides of the international border to take steps to impress on their respective governments that the great canal must be opened and that the conventional delays of diplomacy are without popular approval in either country.

Those who oppose this great improvement would do well to study the record of the Panama and to note what benefits have flowed through the installation of that great canal must be opened and that the conventional delays of diplomacy are without popular approval in either country.

FOR SALE—Jewel range very reasonable, 209 2nd St. 5-27-1w

## BANKERS' VIEWS ON CO-OPERATIVE MARKETING

The attitude of the American Bankers Association on co-operative marketing favors proper organization to facilitate the orderly movement of farm products, but holds that the co-operatives are as amenable to economic laws as any form of business and cannot be used to gain special benefits for the farmer contrary to the influences of supply and demand and other normal factors. This view was formulated recently by Frank W. Simmonds of the Association before the National Council of Farmers' Co-operative and Marketing Associations at Washington.

"It would be unfortunate for the farmer if he becomes imbued with the idea that co-operative marketing in itself is a panacea for all agricultural ills," Mr. Simmonds said. "Co-operative marketing, well organized and wisely managed, can be most helpful in solving marketing problems. It may prevent untimely dumping, it may secure better credit facilities, it may extend existing markets, it may even create new markets, but obviously its operations will be as amenable to economic law as those of other business enterprises."

What It Cannot Do  
"Co-operative marketing cannot prevent other countries with cheap land and labor from selling in foreign markets at a price unattractive to us. It cannot successfully override the law of supply and demand or maintain for any length of time an artificially high price by withholding a product from market or unduly limiting production. Sane, orderly marketing must be accompanied by sane, orderly thinking."

"We may wisely take a leaf from Danish experience and emphasize efficient, economical, maximum production of standard grade products, for however important co-operative marketing may be in solving the exigencies of the present time, it is only one link in the chain of agricultural problems."

The American Bankers Association, Mr. Simmonds said, believes that solutions of farm problems "should be sought through private enterprise and not through government aid," and approves the endeavors of farmers for orderly marketing.

Minot, N. D., May 31—Four or five men arrested at Kenmare Monday and suspected of various crimes, will be turned over to Pierce county authorities on a charge of burglarizing a store at Silva, N. D., while the fifth member will be held here for a Canadian authorities who charge him with robbing a Canadian bank.

Sheriff A. Spieker of Minot, announced today.

Sheriff R. V. McMichael of Wahpeton, Richland county, here with warrants charging the five with burglarizing of an Abercrombie bank in which a loot of \$18,000 was obtained said yesterday it would be satisfactory to him if the men were turned over to the Pierce county officials for the present, thus enabling him to seek further evidence against them.

He also desired to take "Whites" Cline, held for Canadian authorities, to Wahpeton. Cline has previously come in conflict with the law there, the sheriff stated.

Policemen Evans of the Alberta provincial police yesterday took fingerprints of each of the five men, with the hope of identifying them as being among those found following the robbery of numerous Alberta banks.

Dated this 22nd day of May, 1924. S. A. OLSEN, Sheriff of Pierce County, N. D.

## STRAIGHT TALKS WITH AUNT EMMY

### On Investing in Mortgages

"Aunt Emmy, what do you think of mortgages as investments?" asked Ethel.

"First mortgages, generally speaking, are sound investments, but not all first mortgages are good," Aunt Emmy replied. "You must exercise care and discretion. If you know all about the property, or if you are dealing with a financial concern that has a reputation for success and honesty, you should be safe. But it is well to seek advice before investing. Go to your bank, talk the whole thing over and be guided by their advice. Real estate transactions are tricky. Better be safe than sorry. If there is any question as to party walls should be even a few inches over the lot line, you would undoubtedly have trouble."

"Even guaranteed mortgages should not be bought on faith. Never buy a mortgage without knowing the value of the real estate it covers and of the property in the vicinity. Be sure a good lawyer looks over for your interest. With your small capital there is too much risk in buying without every safeguard."

"Remember that taxes and insurance must be paid regularly when they are due. You must know that they are paid, and remember, too, that the property you lend money on should be worth considerably more than you are lending."

"What about second mortgages, Aunt, don't they earn more than first mortgages?" inquired Ethel.

"Sometimes they do. Second mortgages are good investments under certain conditions. But it is not advisable for an investor of limited means to buy them. In case the first mortgage should be foreclosed, the holder of the second mortgage should be in a position to protect his interests by being able to buy the first mortgage. That means you would have to have money on hand."

"Oh, Aunt, exclaimed Ethel, 'you rather frighten me about mortgages.'"

"No, dear, don't feel that way," said Aunt Emmy. "It's all a matter of care and knowledge of conditions. Even if you don't know about them yourself, you can protect yourself by taking the advice of your bankers. Don't trust too much to your own judgment."

ANNE B. AXMES.

Sheriff C. E. Harnit of Rugby may take "Devils Lake Red," alias Linden, Dan Morris, W. E. Arnold, alias Sharkey and Herman Richman, alias Rich to Rugby today.

Clothes the men were when they were arrested have been identified, officials state, as being among the merchandise which was stolen from the Silva store.

NOTICE OF SCHOOL ELECTION  
(Special District—Annual Election)  
Notice is hereby given, that on the First Tuesday in June, being June 3rd, 1924, an annual election will be held at Will School in the Special School District of Bismarck No. 1, County of Burleigh, State of North Dakota for the purpose of electing the following members of the Board of Education, one member to serve for a term of three years for the City of Bismarck, N. Dak. The polls will be opened at 9 o'clock a. m. and closed at 4 p. m. of that day.

Dated Bismarck, N. Dak., this 17th day of May, 1924.

By order of the Board of Education.  
RICHARD PENWARDEN,  
Clerk.  
5-17 to 6-2

**NOTICE**

To the policy holders and stockholders of the Great Northern Life Insurance Company, and to whom it may concern:

You are hereby notified that The Great Northern Life Insurance Company, of Grand Forks, North Dakota, a corporation organized under the laws of the State of North Dakota, engaged in the life insurance business under the laws of such State, has filed with the Commissioner of Insurance of the State of North Dakota, a petition praying for an order to be issued by the Commissioner as provided for under the provisions of Section 4891, Compiled Laws of North Dakota, for 1913, authorizing the cancellation of said The Great Northern Life Insurance Company with and the transfer of all of the assets of said The Great Northern Life Insurance Company, to the Occidental Life Insurance Company, a corporation organized under the laws of the State of California, with its principal office at the city of Los Angeles, State of California, and the said The Great Northern Life Insurance Company, as presented to the Commissioner of Insurance of the State of North Dakota, contract setting forth the terms and conditions of such proposed cancellation, and providing for re-insurance by the holders of such policies.

You are further notified that the 17th day of June, 1924, at 10 o'clock A. M. at the office of the Commissioner of Insurance of the State of North Dakota, in the State Capitol building in the city of Bismarck, State of North Dakota, has been fixed as the time and place for the hearing of said petition before a commission consisting of the Governor of the State of North Dakota, or in the event of his inability to act, some competent person resident of the State, to be appointed by the Governor, the Attorney General and Commissioner of Insurance of the State, and you are further notified that any policy holder or stockholder of said The Great Northern Life Insurance Company may appear before said commission at the time and place and may be heard with reference to such consolidation or re-insurance.

Dated this 22nd day of May, 1924. S. A. OLSEN, Commissioner of Insurance of the State of North Dakota.

## BANKERS' VIEWS ON CO-OPERATIVE MARKETING

The attitude of the American Bankers Association on co-operative marketing favors proper organization to facilitate the orderly movement of farm products, but holds that the co-operatives are as amenable to economic laws as any form of business and cannot be used to gain special benefits for the farmer contrary to the influences of supply and demand and other normal factors. This view was formulated recently by Frank W. Simmonds of the Association before the National Council of Farmers' Co-operative and Marketing Associations at Washington.

"It would be unfortunate for the farmer if he becomes imbued with the idea that co-operative marketing in itself is a panacea for all agricultural ills," Mr. Simmonds said. "Co-operative marketing, well organized and wisely managed, can be most helpful in solving marketing problems. It may prevent untimely dumping, it may extend existing markets, it may even create new markets, but obviously its operations will be as amenable to economic law as those of other business enterprises."

**What It Cannot Do**  
"Co-operative marketing cannot prevent other countries with cheaper land and labor from selling in foreign markets at a price unattractive to us. It cannot successfully override the law of supply and demand or maintain for any length of time an artificially high price by withholding a product from market or unduly limiting production. Same, orderly marketing must be accompanied by sane, orderly thinking."

"We may wisely take a leaf from Danish experience and emphasize efficient, economical, maximum production of standard grade products, for however important co-operative marketing may be in solving the exigencies of the present time, it is only one link in the chain of agricultural problems."

The American Bankers Association, Mr. Simmonds said, believes that solutions of farm problems should be sought through private enterprise and not through government aid, and approves the endeavors of farmers for orderly marketing.

## FOUR SUSPECTS TURNED OVER TO PIERCE CO.

Minot, N. D., May 31—Four or five men arrested at Kenmare Monday and suspected of various crimes, will be turned over to Pierce county authorities on a charge of burglarizing a store at Silva, N. D., while the fifth member will be held here for Canadian authorities who charge him with robbing a Canadian bank.

Sheriff R. V. McMichael of Wahpeton, Richardson county, here with warrants charging the five with burglarizing of an Abercrombie bank in which a loot of \$18,000 was obtained said yesterday it would be satisfactory to him if the men were turned over to the Pierce county officials for the present, thus enabling him to seek further evidence against them.

He also desired to take "Whitey" Cline, held for Canadian authorities, to Wahpeton. Cline has previously come in conflict with the law there, the sheriff stated.

Policemen Evans of the Alberta provincial police yesterday took fingerprints of each of the five men, with the hope of identifying them as being among those found following the robbery of numerous Alberta banks.

## STRAIGHT TALKS WITH AUNT EMMY

## On Investing in Mortgages

"Aunt Emmy, what do you think of mortgages as investments?" asked Ethel.

"First mortgages, generally speaking, are sound investments, but not all first mortgages are good," Aunt Emmy replied. "You must exercise care and discretion. If you know all about the property, or if you are dealing with a financial concern that has a reputation for success and honesty, you should be safe. But it is well to seek advice before investing. Go to your bank, talk the whole thing over and be guided by their advice. Real estate transactions are tricky. Better be safe than sorry. If there is any question as to party walls or if the building on property should be even a few inches over the lot line, you would undoubtedly have trouble."

"Even guaranteed mortgages should not be bought on faith. Never buy a mortgage without knowing the value of the real estate it covers and of the property in the vicinity. Be sure a good lawyer looks out for your interest. With your small capital there is too much risk in buying without every safeguard."

"Remember that taxes and insurance must be paid regularly when they are due. You must know that they are paid, and remember, too, that the property you lend money on should be worth considerably more than you are lending."

"What about second mortgages, Aunt, don't they earn more than first mortgages?" inquired Ethel.

"Sometimes they do. Second mortgages are good investments under certain conditions. But it is not advisable for an investor of limited means to buy them. In case the first mortgage should be foreclosed, the holder of the second mortgage should be in a position to protect his interests by being able to buy the first mortgage. That means you would have to have money on hand."

"Oh, Aunt, I exclaimed Ethel, 'you rather frighten me about mortgages.'"

"No, my dear, don't feel that way," said Aunt Emmy. "It's all a matter of care and knowledge of conditions. Even if you don't know about them yourself, you can protect yourself by taking the advice of your bankers. Don't trust too much to your own judgment!"

ANNE B. ATMES

Sheriff C. E. Harnit of Rugby may take "Devils Lake Red," alias Linden, Dan Morris, W. E. Arnold, alias Sharkey and Herman Richardson, alias Rich to Rugby today.

Clothes the men were when they were arrested have been identified, officials state, as being among the merchandise which was stolen from the Silva store.

## NOTICE OF SCHOOL ELECTION

(Special District—Annual Election) Notice is hereby given, That on the First Tuesday in June, being June 3rd, 1924, an annual election will be held at Will School in the Special School District of Bismarck, No. 1, County of Burleigh, State of North Dakota for the purpose of electing the following members of the Board of Education, one member to serve for a term of three years for the City of Bismarck, N. Dak. The polls will be opened at 9 o'clock a. m. and closed at 4 p. m. of that day.

Dated Bismarck, N. Dak., this 17th day of May, 1924.

By order of the Board of Education.  
RICHARD PENWARDEN,  
Clerk.

## KERNIEFEN

With the all-black flock a square kerchief of black and white printed silk knotted about the shoulders is a knowing touch.

## Pioneer Radio Man Says Radio Will Help Form International Boy Scout Order

## Asks Scouts to Help in Enforcing Radio Laws.

NEW YORK CITY.—Speaking today before one of the largest Boy Scout audiences gathered together in a New York Auditorium, Pierre Boucheron, one of the first radio amateurs in the United States, who early into the ranks of the experimenter dates back to 1906, and now with the Radio Corporation of America, predicted that radio broadcasting would lead the way to the formation of an international Boy Scout organization in which the scattered groups of young men in the principal cities of the world would enjoy relationships far more intimate than any other agency has thus far been able to provide. Mr. Boucheron also pointed out that the limited number of available wavelengths in the ether required the strict observance of laws governing radio and asked the Boy Scouts of America to pledge their support to the work of the Department of Commerce in enforcing these laws.

"I believe radio broadcasting will accomplish even more than this. Already programs broadcast from the United States reach out to foreign lands. Reliable international broadcasting should result from various refinements in transmission

PIERRE BOUCHERON

"The end to rally has long been sounded by a voice of the Boy Scout Movement," said Mr. Boucheron. "It should have been heard throughout hundreds of camps, and taking part in the Boy Scout movement. Yet its feeble signal scarcely reaches the extremities of the continent. Reimbursed by the tremendous power of a powerful broadcasting station, however, the same signal will call a nation of listening scouts to attention. Thus, through the agency of radio, scouts in cities, villages, and hamlets are welded together into a single group and \$100,000,000 may have a similar effect on the voice of the radio."

Commenting on some of the technical problems of radio, Mr. Boucheron said: "There is only one ether, one vast highway in the sky, which must support the burden of every conceivable message hurled thru space whether it be a broadcast or a radio telegraphic wave. We must use this ether with

the utmost respect for the rights of others. This great common highway is divided into 'lanes', which are policed by the radio inspectors of the Department of Commerce in the same manner as our automobile and pedestrian traffic on the streets. With the rapid growth in the number of broadcasting stations in the United States, this broad highway had to be divided into many narrow wavelength bands to make a place for all until today few additional divisions are possible. If thru selfishness, lack of care or ignorance, amateur operators, violate the regulations governing the use of these wavelength roads, the foundation upon which the entire radio structure rests, will collapse. Each listener, amateur and commercial operator has a definite responsibility which he must assume in order to preserve radio's usefulness. I believe the Boy Scouts of America, an organization of 500,000 law-respecting young men, who daily demonstrate their regard for the rights of others and whose loyal devotion to the highest principles of citizenship have won for them the praise of the nation, have an important duty to perform in this radio scheme. They should impress upon others the importance of observing strictly radio laws in general; they should instruct those who, thru lack of knowledge, make trouble for their neighbors by sending amateur messages during the hours set aside for broadcasting and report cases of violation to their local radio inspector; their advice guided by that of their Scout Masters should even extend into the home of the radio novice, who may not be entirely familiar with the operation of a receiver. The Boy Scouts, thru organized radio troops, may thus create another field for their endeavors, which should prove extremely helpful in maintaining a well-organized radio system in America."

## THE OLD HOME TOWN

## STATE LOSES IN CHECK CASE

Bottineau County Wins Mandamus Action

Bottineau county is exempted from loss of \$19,011.82, the amount of a check given by the treasurer of the county to the state of North Dakota on the First National Bank of Bottineau, which closed, in a decision handed down today by District Judge Fred Jansons.

The county treasurer had collected from purchasers or lessees of school lands in Bottineau county, and gave a check to the state treasurer. The check was sent through the Bank of North Dakota and in the meantime the Bottineau bank closed. John Steen, state treasurer, held up payment of state tuition fund money to Bottineau county, holding the county should make good its bad check. A mandamus action was brought by Bottineau county to compel payment of this tuition money, which is sustained by the decision.

Judge Jansons, holding that the county treasurer was acting as an agent of the state, found it unnecessary to decide whether or not the Bank of North Dakota, through which the check passed, was liable, but in answering the question: "Does the Bank of North Dakota sustain the same status and is it subject to the same laws as other banks?" said: "It is, however, my view that the same liability that is imposed on private banks is imposed on the Bank of North Dakota, including liability for negligence."

In 1818 one Bowdler published an expurgated edition of Shakespeare, hence across the verb to bowdlerize.

## NEW JERSEY'S ACE ON SQUAD

CLARENCE PLATT

Announcement has been made that Clarence Platt of Bridgeton, champion shot of New Jersey, has been named to compete with the Americans in the Olympic trap shooting events in Paris this summer.

The word August (the name of the month and the adjective) is derived from the name of the first Roman emperor.

## WOMEN TACKLE WORLD PROBLEM

Will Discuss Problems of World Interest at Federation Convention

By NEA Service  
Los Angeles, May 31—The General Federation of Women's Clubs, representing 2,500,000 club women and sometimes called the balance wheel

of American feminine activities, holds its biennial convention here June 2 to 13.

California, hostess state, has made ready for the coming of the 10,000 delegates with every conceivable plan-hospitality can conjure.

The convention will be notable this year in two respects—for its program and its election situation.

Immigration, the feasibility of uniform marriage and divorce laws, the traffic in narcotics, the latest developments of applied education, the world peace court—all these are problems to be threshed out before the convention adjourns.

The federation is said to be split three ways, on a choice for a new

president. At least, these three women have been mentioned most prominently as candidates: Mrs. John D. Sherman, Estes Park, Colo.; Mrs. W. S. Jennings, Jacksonville, Fla.; and Mrs. Wallace T. Perham, Glendive, Mont.

Resolutions will be introduced, it is expected, urging both political parties in the coming presidential campaign to incorporate in party platforms plans for a world court, endorsement of the Better Homes in America Movement, a federal prison for women and a world opium conference.

Gin gets its name from the French "genievre" for juniper.

## SEE VICTIMS OF ACCIDENT

Three Local Men on N. P. Train Which Killed Two

Three Bismarck men were among passengers of Northern Pacific train No. 3, which struck an automobile in which H. A. Klopke and wife were riding near Detroit, Minnesota, yesterday afternoon, and killed the

two occupants. The local men, Rev. C. F. Strutz, Dr. V. J. LaRose and Orlan A. Olson, all went to the wrecked automobile, but found the victims were dead. The man's head was badly crushed and the woman's neck was broken. The car, a small coupe, was demolished. Eye-witnesses said a string of freight cars obscured the crossing view.

Mr. and Mrs. Klopke were about 50 years of age and had been residents of Detroit for several years. They had no children. He was a retired farmer.

British postage stamps have been printed by four different private firms since 1839.

## 20 INCHES OF SNOW FALLS

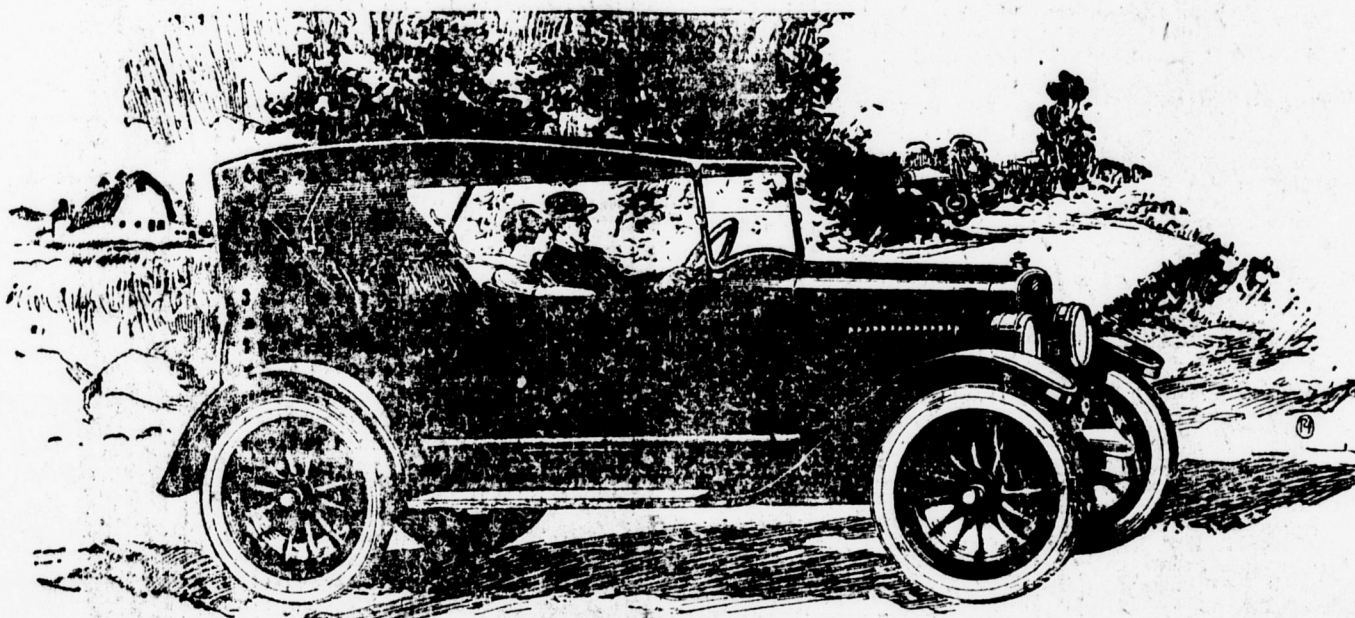

Lander, Wyoming, May 31.—More than 20 inches of snow fell here Thursday and last night, the weather bureau announced, and about eight inches remained on the ground. Some loss of livestock is predicted.

The savings from a railway amalgamation in Great Britain have been put at \$125,000,000 a year.

### Astonishingly Easy Terms

Of the five touring cars formerly priced under \$500, all but two have gone up. Overland prices have not gone up. Overland now is the only touring car with modern sliding gear transmission priced under \$500.

Overland sales increased 177% last year—the greatest rate of increase of any maker building over 100,000 cars. Sales last month were the largest of any May in Overland history. Tremendous volume has enabled Overland to keep its touring car price down at \$495 while other cars have been going upward in price.

The Overland price now is only \$115 above the cheapest touring car built with demountable rims and starter. And you can buy an Overland on Easy Terms.

### 24 Big Car Quality Advantages Which You Can Count Up

- Overland is the only touring car under \$500 with a body entirely of steel—
- The only car under \$800 with a permanent finish of hard baked enamel—
- The only touring car under \$500 with a left front door at the driver's seat—
- The only car under \$500 with a speedometer as standard equipment—
- The only touring car under \$500 with curtains and curtain rods that open with the doors—

The only touring car under \$500 with foot accelerator control—

The only touring car under \$500 exclusively equipped with Timken and New Departure bearings in front and rear axles. Overland uses the best and most expensive bearings more lavishly than any other car in proportion to price.

### Save the Price of Shock Absorbers!

Overland patented springs are the easiest riding springs of any light car built. They give it a spring base of 30 inches longer than any car of equal length—

The only car under \$500 which does not require shock absorbers for maximum riding comfort—

The only touring car under \$500 with quiet, spiral bevel drive and ring gears—

The only touring car under \$500 with fully adjustable windshield—

### Axles of Molybdenum Steel

Overland's rear axle shaft is Molybdenum-steel 1½ inches in diameter—nearly 50% heavier than on any car under \$500.

Overland brakes have 25% more braking surface in proportion to car weight, than any car under \$500—and the only contracting and expanding brakes on any car under \$500.

### Service Records Have Proved Overland Most Economical of All Cars

No car in the world equals Overland's low day-in-and-day-out gasoline economy. No car in the world costs so little for mechanical upkeep.

In power, Overland excels all cars in or near its price class.

This you can prove to your own satisfaction by personal test in a demonstration any Overland dealer will make for you.

Spend 30 minutes examining the Overland car and you will be an Overland enthusiast. Talk to any owner of this Overland and you will be an Overland enthusiast. The more you study Overland, the more completely you will be convinced that it is the lowest cost car in the world to own and operate.

Bring your wife in-to try it out and she will tell you it's the easiest car to handle that she ever drove.

Just bring in your last year's car if you have one and we'll help you buy an Overland the easiest way.

## HEILMANN IS BACK IN LEAD IN AMERICANS

Detroit Slugger Makes Up For Lost Time During the Past Week

WILLIAMS TUMBLES

Chicago, May 31.—(By the A. P.) Harry Heilmann, of the Tigers, has returned to the batting leadership of the American League with a mark of .335, his point since his average a week ago, which then put him second according to averages. Released today, which follows the games of Wednesday, Kenneth Williams, St. Louis slugger who at the last compilation was chief slugger with an average of .347, tumbled violently to .305 and stands number two. Joe Boone, former Southern League now with the Red Sox, but his way into third position with .305.

"Babe" Ruth, has about found his stride with an average of .335. In making his march toward the top the home run king crashed out two circuit drives and ran his string to eleven.

Heilmann increased his lead in total bases to 97, while Joe Harris of Boston, ran his total of runs scored to 34.

Eddie Collins stepped just one base faster than his teammate Bill Barret, which put him in the front with nine.

George Sater led further down the column, his average being .294 compared with .333 a week ago.

Other leading batters: J. Harris, Boston, .309; Meusel, New York, .303; Jamison, Cleveland, .307; Cobb, Detroit, .317; Dugan, New York, .347; Ruth, New York, .309; Judge, Washington, .319; Sheely, Chicago, .309; Jacobson, St. Louis, .300.

Flack Goes Good

Max Flack of the Cardinals, and Jimmy Tierney of the Braves, in the National League, each boosted his mark until now they are keeping company with the leaders, who are being shown the way by Rogers Hornsby, who is comfortably in first place with .321. George Kelly of the Giants, runner-up with .307, displaced Zack Wheat of the Dodgers, who dropped to third with an average of .300. Flack and Tierney are tied with .328.

Hornsby pushed his total base record to 91. Frank Frisch of the Giants swelled his total to 105. Jacques Fournier of the Dodgers, gathered another homer and lead, .324; George Grantham of the Cubs, stole another base and broke the triple tie of a week ago. He has ten.

Other leader batters: Snyder, New York, .309; Fournier, Brooklyn, .306; Frisch, New York, .342; Grantham, Chicago, .329; Flack, St. Louis, .328; Tierney, Boston, .328; Grimes, Cincinnati, .329; Young, New York, .325; Grinn, Pittsburgh, .322.

Neu of St. Paul, who challenged Bunty Brief of Kansas City for the leadership among the batters of the American Association, has dethroned the Kansas slugger, who failed to keep up his hitting, while Neu smashed out 11 hits in his last seven games, acquiring an average of .335, compared with .314 a week ago. Brief dropped to .310, a loss of 24 points. Allen of Indianapolis trailed with .293.

Reb Russell of Columbus and Walker of Minneapolis are tied for home run honors with six each.

In addition to jumping out in front among the batters, Neu also is showing his keenness to the base stealers with 20 thefts, a mark which is better than in practically every league.

Other leading batters: Betzel, Louisville, .290; M. Shannon, Louisville, .302; Covington, Louisville, .302; Bresser, St. Paul, .307; Lamar, Toledo, .311; Macure, Toledo, .307; F. Scott, Kansas City, .300; Grimes, Columbus, .300; Brown, Indianapolis, .296.

GROVE DEFEATS COLLEGE NINE

HERE, 15 TO 8

In a closely played contest on the prison field the Prison team defeated Jamestown college yesterday by a score of 15 to 8. E. E. Smith, having for the prisoners, had everything his own way until the sixth, when Jimtown tallied three times. Smith tore loose a league in his shoulder in this inning and was replaced in the seventh by McCall. The Prison team, however, landed heavily on McCall's offering, and Scott replaced him in the ninth. Grove ran wild in the second when they gathered seven hits, two of which went over the wall. Scott and Pitcher Smith both pounded out home runs in the second. Riley, star third-sacker for the winners, handled a fast one in the fifth, and coupled with a pretty throw, first retired the side. Ragusa, third baseman for the victors, fielded a hot one of Scott's in the seventh. Smith injured his arm in the sixth and allowed the College to count three times. It is not likely that he will be able to work again for some time. Lefty Scott went in in the ninth, when the boys were loaded, making the side with a pretty double.

and allowed a hit one run. The game ended with a strike-out. It looked like an easy win from the start, although the pucky Jimtown pitcher struck out fully in the sixth, which looked like the final out. The next game, the Grove will be

## But He Must Remember Not to Write Stories

SANDY WEINER

Bill Tilden, who stomped his toe on a sliding typewriter and thereby lost his amateur standing in tennis, is rooming Sandy Weiner, 16-year-old Philadelphia boy, as his successor.

Weiner has developed a typical Tilden style on the courts and seems to possess much of the champion's great ability.

Some day he may be the nation's champion but he must remember not to write pieces for the papers or the magazines, for that would make him a notorious professional, as the lawn tennis officials see the matter.

Sunday, June 1, when the first Brad boat team comes here. R. H. E. Jamestown College 15 16 1.

Batteries: Juntown: Bristol, O. Hewitt and McDonald. Grover Smith, Metcalf, Scott and Snyder.

George Sater led further down the column, his average being .294 compared with .333 a week ago.

Four North Dakota boys have qualified in the preliminaries of 4 events run off at the national high school and academy meet which is being held at the University of Chicago according to Associated Press dispatches last evening. They are: Ted Fuller of Fargo, Johnson of Pembina, James McCracken of

Yankton, with Meusel, Pipp and Ward coming up.

A little later in the game he was up against the same situation and once more he kept the Yanks from scoring.

On another occasion, with runners on second and third and one out, the champs looked dangerous. Nothing doing as far as scoring. Wingard stopped 'em.

Wingard won his game 2 to 1, a most unusual contest, since the three runs of the game were made on circuit drives. Ruth scored the Yankees' only tally by hitting one into the right field stand.

If Wingard's performance against the Yankees is a true test of his mental and physical courage, Manager George Sater has picked up one of the finds of the year.

LINTON TEAM TO PLAY HERE

The fast Linton independent baseball team will meet the newly organized Bismarck Independents here Sunday afternoon at 3 p. m. in a baseball game. The Bismarck lineup will be: Fuller, 2ndb; DeSnyder, ss; Thompson, 3b; Byerly, lb; Bauer, rf; Christy, cf; Dohn, if; Sorlien, p.

George Smith, manager, hopes a good crowd will be out to encourage the efforts to promote independent baseball here.

PANCHO VILLA KEEPS TITLE

New York, May 31.—Pancho Villa, sensational Filipino flyweight and holder of the world's 112 pound crown successfully defended his title by decisively outpointing Frankie Ash of England in a 15 round match at the Nostrand A. C. in Brooklyn last night. The champion carried a relentless attack to his challenger throughout and won every round easily. Villa weighed the flyweight limit of 112 while Ash scaled 110½.

Using the RIGHT CLUB IMPORTANT

Knowing How to Play the Shot Is Only One Phase of Golf Success

By Joe Williams

It is one thing to know how to play a golf shot. It is another to know what club to play it with. This may not be as silly as it sounds. The one is a matter of mechanics, the other of judgment.

And in matter of judgment the golfing mind is not always error-proof.

Whether a shot should be played with masher niblick or masher, brassie or full iron frequently forms a problem requiring more than momentary thought.

The stronger club may send you too far, the lighter club may leave you far short.

And the element of doubt thus created is almost sure to play hob with your concentration, with the result that a bad shot is inescapable.

We saw a splendid example of what unerring selection of clubs will do for an ordinary player's game at Inverness several years ago.

J. K. Wadley, a lumberman from the southwest, played a notable round with Jim Barnes, the noted professional, the day before the open championship started.

Wadley is an 85 player or thereabouts. This day he was hitting his shots fairly well, and undoubtedly would have scored decently even without Barnes' help. But he had Barnes' help and he had it at times when perfect judgment was needed most.

This was in the selection of clubs on second and third shots to the green. Whenever there was any

divided among the first ten to complete the race finished as follows: Harry Harts, fourth; Bennie Hill, fifth; Pete De Paulo, sixth; Fred Comer, seventh; Ira Vail, eighth; Antoine Mourre, ninth, and Robert McDonough, tenth.

A consolation prize of \$10,000 was distributed among the other 12 drivers who started.

Corum Gets \$28,000

Corum, as a result of the victory will receive \$20,000 for first place, approximately \$8,000 offered by accessory firms and numerous cups and trophies. He did not win any of the lap money, this going to Cooper, Murphy and Boyer. Boyer got into the lap money by shoving

his own car over the tape first in the initial lap. Cooper's lap prizes were announced at totalling \$3,400 and Murphy's \$3,800.

RACER KILLED

Norfolk, Va., May 31.—Paul T. Murtha, 28, of Norfolk, was fatally injured yesterday in an automobile race at the Dixie track here. His car skidded, went through the fence,

turned over and landed with the seat on the driver's neck. Murtha was pronounced dead when rushed to a hospital.

A special light ray which will penetrate 300 yards under water at any depth has been invented by an Italian.

Knowledge That Pays

You gain a degree of satisfaction just in knowing things—what Einstein believes, how radium burns, which kings are still holding thrones. Yet such knowledge gives you little more than just that satisfaction.

By reading advertisements, you gain knowledge that pays . . . that pays you definitely in time, money, comfort and convenience.

Each day in these pages, advertisers tell you of products devised to make you happier. They seek to arouse you to improvements that will enrich your home, lessen your work.

By reading the advertisements, you can know where to secure the best and most serviceable for you. You can avoid inferior goods and uncertain shopping. You can save.

Read the advertisements. You owe it to the advertisers who are trying to serve you—and to yourself.
